**Countercurrent Chromatography** A. Berthod, 2002-10-10 Countercurrent chromatography CCC is a separation technique in which the stationary phase is a liquid The mobile phase is also a liquid so biphasic liquid systems with at least two solvents are used Centrifugal fields are used to hold the liquid stationary phase while pushing the liquid mobile phase through it This comprehensive reference covers recent advancements in the two types of CCC machines the high speed CCCs without rotary seals and with coiled spools and centrifugal partition chromatographs CPC with rotary seals and interconnected channels Written by leading international experts in the CCC field the book focuses on the liquid nature of the stationary phase giving newcomers the basis to do CCC efficiently and rapidly explaining the art of obtaining a biphasic liquid system describing the flow patterns in both CPC and high speed CCC machines showing possible other uses of a liquid stationary phase presenting a wealth of applications in the separation of organic pharmaceutical and inorganic mixtures and demonstrating that even supercritical fluids can be used in CCC

**Natural Products Isolation** Satya D. Sarker, 2008-02-05 The term natural products spans an extremely large and diverse range of chemical compounds derived and isolated from biological sources Our interest in

natural products can be traced back thousands of years for their usefulness to humankind and this continues to the present day. Compounds and extracts derived from the biosphere have found uses in medicine, agriculture, cosmetics, and food in ancient and modern societies around the world. Therefore, the ability to access natural products, understand their usefulness, and derive applications has been a major driving force in the field of natural product research. The first edition of *Natural Products Isolation* provided readers for the first time with some practical guidance in the process of extraction and isolation of natural products and was the result of Richard Cannell's unique vision and tireless efforts. Unfortunately, Richard Cannell died in 1999 soon after completing the first edition. We are indebted to him and hope this new edition pays adequate tribute to his excellent work. The first edition laid down the ground rules and established the techniques available at the time. Since its publication in 1998, there have been significant developments in some areas in natural product isolation. To capture these developments, publication of a second edition is long overdue, and we believe it brings the work up to date while still covering many basic techniques known to save time and effort and capable of results equivalent to those from more recent and expensive techniques.

**Flavonoids** Oyvind M. Andersen, Kenneth R. Markham, 2005-12-09 Advances in the flavonoid field have been nothing short of spectacular over the last 20 years. While the medical field has noticed flavonoids for their potential antioxidant, anticancer, and cardioprotective characteristics, growers and processors in plant sciences have utilized flavonoid biosynthesis and the genetic manipulation of the flavonoid pathway.

**Essential Oils** Valdir Florêncio da Veiga Jr., Isiaka Ajani Ogunwande, José L. Martinez, 2023-12-01 Essential oils, well known for their remarkable properties, have played a ubiquitous role throughout human history. They connect us to our past, invoking memories of childhood places and the aromas of our grandparents' kitchens. From the fragrant scents of ancient Egypt to the natural preservatives found in 15th-century Oriental spices, essential oils have the ability to stimulate, numb, and captivate our senses through their effects on the central nervous system. This book presents several innovative studies on the isolation, biological, and pharmacological properties of essential oils conducted by multidisciplinary groups from different countries.

**Phytochemical analysis of Baby Banana peels (*Musa acuminata*) in relation with a hyperpigmentation phenomenon** Marcela Castro Benitez, 2015-08-25 The Dissertation titled *Phytochemical analysis of Baby Banana peels (*Musa acuminata*) in relation with a hyperpigmentation phenomenon* described as a phytochemical analysis by means of HSCCC (High Speed Countercurrent Chromatography) supports that the climate change could have altered the Baby Banana quality and its metabolic behavior during the postharvest stage. Still, this is the first report of the analysis of a Baby Banana peel from Colombia in the scientific literature.
