High Cost Of Free Parking:

The High Cost of Free Parking Donald Shoup, 2017-10-20 One of the American Planning Association's most popular and influential books is finally in paperback with a new preface from the author on how thinking about parking has changed since this book was first published. In this no holds barred treatise Donald Shoup argues that free parking has contributed to auto dependence, rapid urban sprawl, extravagant energy use, and a host of other problems. Planners mandate free parking to alleviate congestion but end up distorting transportation choices, debasing urban design, damaging the economy, and degrading the environment. Ubiquitous free parking helps explain why our cities sprawl on a scale fit more for cars than for people and why American motor vehicles now consume one eighth of the world's total oil production. But it doesn't have to be this way. Shoup proposes new ways for cities to regulate parking, namely charge fair market prices for curb parking, use the resulting revenue to pay for services in the neighborhoods that generate it, and remove zoning requirements for off street parking. Such measures, according to the Yale trained economist and UCLA planning professor, will make parking easier and driving less necessary. Join the swelling ranks of Shoupistas by picking up this book today. You'll never look at a parking spot the same way again.

Evaluating the Effects of California's Parking Cash-out Law Donald C. Shoup, 1997 The Rise and Fall of Hayward's Route 238 Bypass Sherman Lewis, 2021-11-15 The story of a city that decided very slowly to live better without a freeway Wisdom for scholars and guidance for activists in narrative form Rail and the City Roxanne Warren, 2014-09-12 An architect makes the case for rail transit as the critical infrastructure for a fluidly functioning and environmentally sustainable urban society The United States has evolved into a nation of twenty densely populated megaregions Yet despite the environmental advantages of urban density urban sprawl and reliance on the private car still set the pattern for most new development Cars guzzle not only gas but also space as massive acreage is dedicated to roadways and parking Even more pressing the replication of this pattern throughout the fast developing world makes it doubtful that we will achieve the reductions in carbon emissions needed to avoid climate catastrophe In Rail and the City architect Roxanne Warren makes the case for compact urban development that is supported by rail transit Calling the automobile a relic of the twentieth century Warren envisions a release from the tyrannies of traffic congestion petroleum dependence and an oppressively paved environment Technical features of rail are key to its high capacities safety at high speeds and compactness uniquely qualifying it to serve as ideal infrastructure within and between cities Ultimately mobility could be achieved through extensive networks of public transit particularly rail supplemented by buses cycling walking car sharing and small flexible vehicles High speed rail fed by local transit could eliminate the need for petroleum intensive plane trips of less than 500 miles Warren considers issues of access to transit citing examples from Europe Japan and North America and pedestrian and

transit oriented urban design Rail transit she argues is the essential infrastructure for a fluidly functioning urban society

New SubUrbanisms Judith De Jong, 2013-09-11 Historically we see the city as the cramped crumbling core of development and culture and the suburb as the vast outlying wasteland convenient but vacant Contemporary urban design proves this wrong In New SubUrbanisms Judith De Jong explains the on going flattening of the American Metropolis as suburbs are becoming more like their central cities and cities more like their suburbs through significant changes in spatial and formal practice as well as demographic and cultural changes These revisionist practices are exemplified in the emergence of hybrid sub urban conditions such as parking practices the residential densification of suburbia hyper programmed public spaces and inner city big box retail among others Each of these hybridized conditions reflects to varying degrees the reciprocating influences of the urban and the suburban Each also offers opportunities for innovation in new formal and spatial practices that re configure conventional understandings of urban and suburban and in new ways of forming the evolving American metropolis Based on this new understanding De Jong argues for the development of new ways of building the city Aimed at students and practitioners of urban design and planning New SubUrbanisms attempts to re frame the contemporary metropolis in a way that will generate more instrumental engagement and ultimately better design

Committee on Transportation and Housing,2009 **Access** ,2013 **The Road More Traveled** Theodore Balaker,Sam Staley,2006-09-27 Balaker and Staley explain how a misguided belief in ten myths of car crazy suburbia makes us hesitant to embrace the right solutions They also explore how a Congestion Coalition refuses to fix the problem Despite these obstacles Balaker and Staley show how we can apply meaningful transportation policy innovations to tame congestion and adopt important lessons learned from our global competitors to change course The Road More Traveled points the way to a dynamic future in which people products and ideas move about freely and U S cities remain competitive in a global economy BOOK JACKET Parking and the City Donald Shoup,2018-04-11 Donald Shoup brilliantly overcame the challenge of writing about parking without being boring in his iconoclastic 800 page book The High Cost of Free Parking Easy to read and often entertaining the book showed that city parking policies subsidize cars encourage sprawl degrade urban design prohibit walkability damage the economy raise housing costs and penalize people who cannot afford or choose not to own a car Using careful analysis and creative thinking Shoup recommended three parking reforms 1 remove off street parking requirements 2 charge the right prices for on street parking and 3 spend the meter revenue to improve public services on the metered streets Parking and the City reports on the progress that cities have made in adopting these three reforms The successful outcomes provide convincing evidence that Shoup s policy proposals are not theoretical and idealistic but instead are practical and realistic The good news about our decades of bad planning for parking is that the damage we have done will be far cheaper to repair than to ignore The 51 chapters by 46 authors in Parking and the City show how reforming our misguided and wrongheaded parking policies can do a world of good Read more about parking benefit districts with a free download of Chapter 51 by copying the link below into your browser <https://www.routledge.com/posts/13972> Parking a Car in the San Francisco Bay Area John Rudolph,2005 **Urban Land** ,2007
