High Himalaya:

Murder in the High Himalaya Jonathan Green, 2010-06-01 On September 30 2006 gunfire echoed through the thin air near Advance Base Camp on Cho Oyu Mountain. Frequented by thousands of climbers each year, Cho Oyu lies nineteen miles east of Mt Everest on the border between Tibet and Nepal. To the elite mountaineering community it offers a straightforward summit; a warm up climb to her formidable sister. To Tibetans, Cho Oyu promises a gateway to freedom through a secret glacial path. The Nangpa La Murder in the High Himalaya is the unforgettable account of the brutal killing of Kelsang Namtso, a seventeen year old Tibetan nun fleeing to India by Chinese border guards. Witnessed by dozens of Western climbers, Kelsang's death sparked an international debate over China's savage oppression of Tibet. Adventure reporter Jonathan Green has gained rare entrance into this shadow land at the rooftop of the world. In his affecting portrait of modern Tibet, Green raises enduring questions about morality and the lengths we go to achieve freedom.

The Himalayan Glaciers, Climate Change and Society R. K. Ganjoo, M. N. Koul, 2025-01-20 This book provides detailed information on the Northwestern Himalayas in India. The scientific data compiled in the book is based on more than two decades of field and laboratory studies by the authors. The Ladakh region is a well known cold desert with unique geological and climatic setting. The influence of Westerlies in the region has played a significant role in the Ladakh region to behave much differently than rest of the Himalaya. The Karakorum Anomaly has been a key factor in negating the effect of global climate change in this region of Himalaya. The scientific discussion of some major glaciers of the region as case study are also discussed in this book. The uniqueness of the region with respect to climate shall be elaborated with the help of case studies.
