Finding Lost Space Theories Of Urban Design:

Finding Lost Space Roger Trancik, 1991-01-16 The problem of lost space or the inadequate use of space afflicts most urban centers today The automobile the effects of the Modern Movement in architectural design urban renewal and zoning policies the dominance of private over public interests as well as changes in land use in the inner city have resulted in the loss of values and meanings that were traditionally associated with urban open space This text offers a comprehensive and systematic examination of the crisis of the contemporary city and the means by which this crisis can be addressed Finding Lost Space traces leading urban spatial design theories that have emerged over the past eighty years the principles of Sitte and Howard the impact of and reactions to the Functionalist movement and designs developed by Team 10 Robert Venturi the Krier brothers and Fumihiko Maki to name a few In addition to discussions of historic precedents contemporary approaches to urban spatial design are explored Detailed case studies of Boston Massachusetts Washington D C Goteborg Sweden and the Byker area of Newcastle England demonstrate the need for an integrated design approach one that considers figure ground linkage and place theories of urban spatial design These theories and their individual strengths and weaknesses are defined and applied in the case studies demonstrating how well they operate in different contexts This text will prove invaluable for students and professionals in the fields of architecture landscape architecture and city planning Finding Lost Space is going to be a primary text for the urban designers of the next generation It is the first book in the field to absorb the lessons of the postmodern reaction including the work of the Krier brothers and many others and to integrate these into a coherent theory and set of design guidelines Without polemics Roger Trancik addresses the biggest issue in architecture and urbanism today how can we regain in our shattered cities a public realm that is made of firmly shaped coherently linked humanly meaningful urban spaces Robert Campbell AIA Architect and architecture critic Boston Globe

Vinit Mukhija Chelina Odbert Francesca Piazzoni and Michael Rios The Form of Cities Alexander R. Cuthbert, 2008-04-15

The Form of Cities offers readers a considered theoretical introduction to the art of designing cities Demonstrates that cities are replete with symbolic values collective memory association and conflict Proposes a new theoretical understanding of urban design based in political economy Demonstrates different ways of conceptualising the city whether through aesthetics or the prism of gender for example Written in an engaging and jargon free style but retains a sophisticated interpretative edge Complements Designing Cities by the same author Blackwell 2003 **Interpreting the City** Truman Asa Hartshorn, 1992-04-16

The Second Edition has been rewritten to provide additional coverage of topics such as urban development and third world cities as well as social issues including homelessness jobs housing mismatch and transportation disadvantages It has also been updated with 1990 Census data *Adaptation Urbanism and Resilient Communities* Billy Fields, John L. Renne, 2021-05-03

Adaptation Urbanism and Resilient Communities outlines and explains adaptation urbanism as a theoretical framework for understanding and evaluating resilience projects in cities and relates it to pressing contemporary policy issues related to urban climate change mitigation and adaptation Through a series of detailed case studies this book uncovers the promise and tensions of a new wave of resilient communities in Europe Copenhagen Rotterdam and London and the United States New Orleans and South Florida In addition best practice projects in Amsterdam Barcelona Delft Utrecht and Vancouver are examined The authors highlight how these communities are reinventing the role of streets and connecting public spaces in adapting to and mitigating climate change through green blue infrastructure planning maintaining and enhancing sustainable transportation options and struggling to ensure equitable development for all residents The case studies demonstrate that while there are some more universal aspects to encouraging adaptation urbanism there are also important local characteristics that need to be both acknowledged and celebrated to help local communities thrive in the era of climate change The book also provides key policy lessons and a roadmap for future research in adaptation urbanism Advancing resilience policy discourse through multidisciplinary framework this work will be of great interest to students of urban planning geography transportation landscape architecture and environmental studies as well as resilience practitioners around the world **Streets and Patterns** Stephen Marshall, 2004-08-02

There is an emerging consensus that urban street layouts should be planned with greater attention to placemaking and urban design quality while maintaining the conventional transport functions of accessibility and connectivity However it is not always clear how this might be achieved we still tend to have different sets of guidance for main road networks and for local street grids What is needed is a framework that addresses both of these plus main streets that don't easily fit either set of guidance in an integrative manner Streets and Patterns takes up this challenge to create a coherent rationale to underpin today's streets oriented urban design agenda Informed by recent research the book looks behind existing design conventions and beyond immediate policy rhetoric and analyses a range of first principles from Le Corbusier and Colin Buchanan to New Urbanism

The book provides a new framework for the design and planning of urban layouts integrating transport issues such as road hierarchy arterial streets and multi modal networks with urban design and planning issues such as street type grid type mixed use blocks and urban design coding *Cut and Paste Urban Landscape* Mira Engler, 2015-08-11 During the post war era the emerging consumer economy radically changed both the discourse and practice of architecture It was a time where architecture became a mainstream commodity whose products sold through mass media a time in which Thomas Gordon Cullen came to be one of Britain's best known twentieth century architectural draftsmen Despite Cullen's wide acclaim there has been little research into his life and work particularly his printed images and his methods of operation This book examines Cullen's drawings and book design and also looks into his process of image making to help explain his considerable popularity and influence which continues to this day It presents the lessons Cullen had to offer in today's design culture and practice and looks into the post war consumerist design strategies that are still used today

Crisis, Conflict and Celebration Katarzyna Kajdanek,Anna Bednarczyk,Rui Carvalho,2025-02-03 This book illuminates how the profound challenges faced by contemporary societies over the past few decades encompassing climate change and other environmental risks global health threats warfare and mass migration manifest themselves in European cities The chapters bring cutting edge ethnographic studies which address these complex issues through three key conceptual dimensions of urban life crisis conflict and celebration The concept of crisis is critically explored in its various economic political and cultural dimensions affecting urban residents in multiple social and spatial aspects of their lives Crises often lead to conflicts dynamic processes that give rise to interest groups and complex social landscapes of resistance By examining conflicts in urban contexts the book uncovers the power dynamics and vulnerabilities emerging during turbulent times Crises and conflicts also present opportunities for urban transformation and regeneration bringing underlying beliefs and norms into question paving the way for new social dynamics within urban environments These conflictual spaces can therefore become arenas for celebration of urbanity where communities express resilience cultural identity and collective solidarity As well as providing new insights into the present and future of European cities and the pivotal role of urban areas as centers of social change contestation and community building the book provides an important methodological contribution through innovative qualitative research in a diverse range of European urban areas Ways to Study and Research Urban,

Architectural and Technical Design T.M. de Jong, D.J.M. van der Voordt, 2002 How can we develop a scientific basis for architectural urban and technical design When can a design be labelled as scientific output comparable with a scientific report What are the similarities and dissimilarities between design and empirical research and between design research typological research design study and study by design Is there a need for a particular methodology for design driven study and research With these questions in mind more than forty members of the Faculty of Architecture of the Delft University of Technology have described their ways of study and research Each chapter shows the objectives the methodology and its implementation in search for a deeper knowledge of design processes and an optimal quality of the design itself The authors among them architects urban planners social scientists lawyers technicians and information scientists have widely differing backgrounds Nevertheless they share a great deal The central focus is a better understanding of design processes design tools and the effects of design interventions on issues such as utility aesthetics meaning sustainability and feasibility *Law, Religion and the Environment in Africa* M. Christian Green, Muhammed Haron, 2020-06-03 This volume explores themes of ecotheology ecofeminism environmental pollution and degradation climate change human and environmental rights sustainable development human animal relations through totem and taboo sacred sites and spaces and other environmental topics in ways that add immeasurably to the study of African environmentalisms and the interaction of law and religion In terms of religion the capability of humans not only to sin and destroy the earth but also to repair and redeem it is very much in evidence across Christianity Islam and Africa's many indigenous religious and cultural traditions In terms of law the need for effective policies and for states and governments to work with indigenous groups and communities towards environmental solutions is also apparent **City** William H. Whyte, 2012-09-10 Named by Newsweek magazine to its list of Fifty Books for Our Time For sixteen years William Whyte walked the streets of New York and other major cities With a group of young observers camera and notebook in hand he conducted pioneering studies of street life pedestrian behavior and city dynamics *City Rediscovering the Center* is the result of that research a humane often amusing view of what is staggeringly obvious about the urban environment but seemingly invisible to those responsible for planning it Whyte uses time lapse photography to chart the anatomy of metropolitan congestion Why is traffic so badly distributed on city streets Why do New Yorkers walk so fast and jaywalk so incorrigibly Why aren't there more collisions on the busiest walkways Why do people who stop to talk gravitate to the center of the pedestrian traffic stream Why do places designed primarily for security actually worsen it Why are public restrooms disappearing The city is full of vexations Whyte avers Steps too steep doors too tough to open ledges you cannot sit on It is difficult to design an urban space so maladroitly that people will not use it but there are many such spaces Yet Whyte finds encouragement in the widespread rediscovery of the city center The future is not in the suburbs he believes but in that center Like a Greek agora the city must reassert its most ancient function as a place where people come together face to face
