Vasilakos, Qun Jin, Hongbo Zhu, 2017-07-12 D2D based proximity service is a very hot topic with great commercial potential from an application standpoint Unlike existing books which focus on D2D communications technologies this book fills a gap by summarizing and analyzing the latest applications and research results in academic industrial fields and standardization The authors present the architecture fundamental issues and applications in a D2D networking environment from both application and interdisciplinary points of view Annual Report of the Commissioner of Agriculture and Public Works for the Province of Ontario, on Agriculture and Arts for the Year Ontario.
