Through an investigation into the work of George Martin and his team as well as The Beatles themselves this text sheds light on the role of the studio in shaping the group's eclectic but unique sound. The chapters address what makes a song Beatlesque to what extent production choices are responsible for developing a style, production being understood not as a mere set of technicalities but also in a more conceptual way as well as the aesthetics, semiotics and philosophy that animated studio activity. The outcome is a book that will appeal to both students and researchers as well as of course musicophiles of all kinds.
