Finite Groups Of Automorphisms:

Finite groups of automorphisms Norman Biggs,1969 *Finite Groups of Automorphisms* Norman Biggs,1971-10-31
These are notes of lectures given at the University of Southampton October-December 1969. The lectures were intended for research students working in areas related to the topics discussed and for mathematicians working in other fields who were interested in hearing a survey of some current problems and their background. The character of the lectures has been retained by the inclusion of occasional philosophical remarks but the text has been kept free of references as far as possible.

Automorphisms of Finite Groups Inder Bir S. Passi, Mahender Singh, Manoj Kumar Yadav, 2018. The book describes developments on some well known problems regarding the relationship between orders of finite groups and that of their automorphism groups. It is broadly divided into three parts: the first part offers an exposition of the fundamental exact sequence of Wells that relates automorphisms, derivations and cohomology of groups along with some interesting applications of the sequence. The second part offers an account of important developments on a conjecture that a finite group has at least a prescribed number of automorphisms if the order of the group is sufficiently large. A non-abelian group of prime power order is said to have divisibility property if its order divides that of its automorphism group. The final part of the book discusses the literature on divisibility property of groups culminating in the existence of groups without this property.

Unifying various ideas developed over the years, this largely self-contained book includes results that are either proved or with complete references provided. It is aimed at researchers working in group theory in particular graduate students in algebra.

Rodríguez, 2014-11-21 This volume contains the proceedings of the conference on Riemann and Klein Surfaces Symmetries and Moduli Spaces in honor of Emilio Bujalance held from June 24 28 2013 at Linköping University The conference and this volume are devoted to the mathematics that Emilio Bujalance has worked with in the following areas all with a computational flavor Riemann and Klein surfaces automorphisms of real and complex surfaces group actions on surfaces and topological properties of moduli spaces of complex curves and Abelian varieties [Geometry at the Frontier: Symmetries and Moduli Spaces of Algebraic Varieties](#) Paola Comparin, Eduardo Esteves, Herbert Lange, Sebastián Reyes-Carocca, Rubí E. Rodríguez, 2021-04-23 Articles in this volume are based on lectures given at three conferences on Geometry at the Frontier held at the Universidad de la Frontera Pucón Chile in 2016 2017 and 2018 The papers cover recent developments on the theory of algebraic varieties in particular of their automorphism groups and moduli spaces They will be of interest to anyone working in the area as well as young mathematicians and students interested in complex and algebraic geometry [Automorphisms of Riemann Surfaces, Subgroups of Mapping Class Groups and Related Topics](#) Aaron Wootton, S. Allen Broughton, Jennifer Paulhus, 2022-02-03 Automorphism groups of Riemann surfaces have been widely studied for almost 150 years This area has persisted in part because it has close ties to many other topics of interest such as number theory graph theory mapping class groups and geometric and computational group theory In recent years there has been a major revival in this area due in part to great advances in computer algebra systems and progress in finite group theory This volume provides a concise but thorough introduction for newcomers to the area while at the same time highlighting new developments for established researchers The volume starts with two expository articles The first of these articles gives a historical perspective of the field with an emphasis on highly symmetric surfaces such as Hurwitz surfaces

The second expository article focuses on the future of the field outlining some of the more popular topics in recent years and providing 78 open research problems across all topics The remaining articles showcase new developments in the area and have specifically been chosen to cover a variety of topics to illustrate the range of diversity within the field

Ischia Group Theory 2010 Mariagrazia Bianchi, Mariagrazia Bianchi Oddera, Patrizia Longobardi, Mercede Maj, 2012 The papers in this volume represent the proceedings of the Conference entitled Ischia Group Theory 2010 which took place at NH Ischia Thermal SPA Resort Ischia Naples Italy from April 14 to April 17 2010 The articles in this volume are contributions by speakers and participants of the Conference The volume contains a collection of research articles by leading experts in group theory and some accessible surveys of recent research in the area Together they provide an overview of the diversity of themes and applications that interest group theorists today Topics covered in this volume include finite p groups character and representation theory combinatorial group theory varieties of groups profinite and pro p groups linear groups graphs connected with groups subgroup structure finiteness conditions radical rings conjugacy classes automorphisms

The Maximal Factorizations of the Finite Simple Groups and Their Automorphism Groups Martin W. Liebeck, Cheryl E. Praeger, Jan Saxl, 1990 The main result describes completely the maximal factorizations of all the finite simple groups and their automorphism groups As a consequence a classification of the maximal subgroups of the finite alternating and symmetric groups is obtained

Algebraic Geometry Igor V. Dolgachev, JongHae Keum, Shigeyuki Kondō, 2007 This volume contains the proceedings of the Korea Japan Conference on Algebraic Geometry in honor of Igor Dolgachev on his sixtieth birthday The articles in this volume explore a wide variety of problems that illustrate interactions between algebraic geometry and other branches of mathematics Among the topics covered by this volume are algebraic curve theory algebraic surface theory moduli space automorphic forms Mordell Weil lattices and automorphisms of hyperkahler manifolds This book is an excellent and rich reference source for researchers
