**Fire and Rain, Answering the Rune's Call** Sara Annon,2019-01-18 This series rises out of my personal journey with the Runes that began during a Mask Dance workshop in Northern Germany the birthplace of the runes During the week I spent in a lovely seminar house secluded in among the trees bordering the heather of the Lunebergerheide I found myself tasked with telling the story of the Runes as one of creation not destruction We used shamanic drumming and rattling to drive the visionary state and a specific body posture to guide our experience My time was spent deep in a philosophical discussion with the energetic field of the Runes It was impressed on me that the two fundamental distortions in the historical practice of Runes were the suppression of sexual energy in Christianity and the Germanic tribe s practice of ritual killing to gain personal power I was shown how this combination inherently leads to atrocities My first step was to seek out any creation stories I could find that were related to the runes Somewhat to my surprise I did not find any direct or obvious correlations between the runes names and the stories In fact the use of the runes as an alphabet turned out to be driven by the Christian Church Then I looked into the current practice of Rune Stances and found their origins were both recent and suspect Along the way I had to admit that if the creation story of the runes was readily accessible they would not have had to grab hold of an ignorant mixed blood New Mexican to tell their tale What I had to offer was my own idiosyncratic view of the situation Since I had experience with ecstatic trance postures I wondered if rune shapes corresponded with ancient ecstatic body postures Once I turned towards the much older and more mysterious visionary roots of the Runes my path to a runic story of creation began to open I ended up with a mosaic of a sacred World Tree made of ancient bits and pieces I hope they can open creative experiential doors for those drawn to work in the runic realms Keywords Ancestry Creation Myths Ecstatic Trance Postures Epigenetics Rune Stances Runes Sacred Speech World Tree Shamanism Sustainable

**Earth, Wind, Fire, and Rain** Judy Dodge Cummings,2018-02-01 We might think humans have control over our environment but Mother Nature has proven us wrong again and again Earth Wind Fire and Rain Real Tales of Temperamental Elements tells the story

of five of America's deadliest natural disasters that were made worse by human error, ignorance, and greed. For example, in the fall of 1871, loggers and farmers chopped trees and burned brush in the vast forest around Peshtigo. Wisconsin Fire was a tool they believed they could control. But on October 8, 1 million acres burned in the deadliest fire in American history. Later that century, meteorologists mistakenly predicted clearing skies for New York City on March 10, 1888. Then two devilish storm fronts collided in what was called the Great White Hurricane. The blizzard brought New Yorkers to their knees, and unprepared city leaders were powerless to help. Powerless too were the residents of Johnstown, Pennsylvania, on May 31, 1889. A private club of wealthy businessmen owned a dam upriver from Johnstown. The club modified the dam to improve recreation on their private lake, but these changes weakened the structure. When heavy rains fell, the dam burst, flooding Johnstown with 20 million tons of water. Residents of San Francisco had no warning when a massive earthquake struck on April 18, 1906. It toppled buildings, ruptured gas mines, and ignited fires. Years of political corruption had underfunded the fire department, leaving it without the equipment or training to quench the inferno, and San Francisco burned. In the 1920s, farmers transformed the dry, windy southern Plains by digging up the buffalo grass and planting millions of acres of wheat. But nature fought back by turning this breadbasket into a Dust Bowl. On April 14, 1935, Black Sunday, a 200-mile cloud of dirt buried fields, livestock, and people. People's choices did not cause these disasters, but they did give the forces of nature an extra nudge. However, tragedy sparked reforms in weather forecasting, soil, and forest management, and emergency preparation. But remember, no one can control nature. So be prepared to get out of the way when disaster strikes.
