## **Fire From Ice Searching For The Truth Behind The Cold Fusion Furor:**

*Fire from Ice* Eugene F. Mallove, 1991 Discusses the furor over the announcement that scientists had succeeded in producing controlled nuclear fusion at ordinary temperatures describes the further research that has been done and argues that cold fusion may still eventually be perfected

**Fire from Ice** Eugene F. Mallove, 1999-06

**Carbon Dating, Cold Fusion, and a Curve Ball** David D. Moon, 2022-01-28 Paleontologists and geologists are interested in the ages of fossils rocks and minerals from which they deduce the ages of geologic strata in the Geologic Column Scientists make use of radioactive dating methods such as the radioactive decays of carbon 14 uranium 238 and thorium 232 in fossils and minerals Accurate age determinations depend on knowing the rate of the radioactive emissions and the relative amounts of initial and product elements in the decay series However if an interfering nuclear change took place earlier the perceived age of the earth deposit would have to be wrong In 1989 the discovery of cold fusion the fusion of hydrogen to make helium and energy inside metal electrodes at room temperature was announced by Drs Martin Fleischmann and Stanley Pons at the University of Utah Soon after cold fusion research also revealed that nuclear transmutations forming many new elements occur liberally Even purposely added radioactive uranium and thorium in cold fusion type cells resulted in transmutations and the disappearance of up to 95 percent of the radioactivity in hours or minutes In addition special water pumps invented in America and Europe were discovered to generate excess heat and possible nuclear effects by intensely agitating water and creating cavitation bubbles In *Carbon Dating Cold Fusion and a Curve Ball* the author postulates interfering nuclear element changes occurring in the Earth and proposes that extensive element transmutations occurred from intense hydrodynamics during the Flood of Noah Genesis 6 8 If so it is conceivable much alteration of radioactive elements took place rendering unreliable the radioactive dating results in most analyses done today A relatively simple test of this theory is outlined The test would use a piece of bismuth metal a tank of water and a boat s outboard motor The book is written for the non scientist but those trained in the physical sciences or engineering are invited to examine the new hypothesis of Earth s element transmutations and the consequential alteration of dating earth material by radioactive elements

Cold Fusion Jean-Paul Biberian, 2020-01-14 Cold Fusion Advances in Condensed Matter Nuclear Science provides a concise description of the existing technological approaches in cold fusion or low energy nuclear reaction engineering It handles the chemistry physics materials and various processes involved in cold fusion and provides a critical analysis of obtained theoretical and experimental results The book has a very international appeal with the editor from France and an international pool of chapter authors from academia and industry This book is an indispensable resource for researchers in academia and industry connected with combustion processes and synthesis all over the world

Starring the Text Alan G. Gross, 2006 Starring the Text The Place of Rhetoric in Science Studies firmly establishes the rhetorical analysis of science as a respected field of study Alan G Gross one of rhetoric s foremost authorities summarizes the state of the field and demonstrates the role of rhetorical

analysis in the sciences He documents the limits of such analyses with examples from biology and physics explores their range of application and sheds light on the tangled relationships between science and society In this deep revision of his important Rhetoric of Science Gross examines how rhetorical analyses have a wide range of application effectively exploring the generation spread certification and closure that characterize scientific knowledge Gross anchors his position in philosophical rather than in rhetorical arguments and maintains there is rhetorical criticism from which the sciences cannot be excluded Gross employs a variety of case studies and examples to assess the limits of the rhetorical analysis of science For example in examining avian taxonomy he demonstrates that both taxonomical and evolutionary species are the product of rhetorical interactions A review of Newton s two formulations of optical research illustrates that their only significant difference is rhetorical a difference in patterns of style arrangement and argument Gross also explores the range of rhetorical analysis in his consideration of the evolution of Darwin s notebooks In his analysis of science and society he explains the limits of citizen action in executive judicial and legislative democratic realms in the struggle to prevent ameliorate and provide adequate compensation for occupational disease By using philosophical historical and psychological perspectives Gross concludes rhetorical analysis can also supplement other viewpoints in resolving intellectual problems Starring the Text which includes fourteen illustrations is an updated readable study geared to rhetoricians historians philosophers and sociologists interested in science The volume effectively demonstrates that the rhetoric of science is a natural extension of rhetorical theory and criticism
