with the places it visits and if the other agents approve with the other agents it encounters in those places **Electronic Commerce and Web Technologies** Kurt Bauknecht,Sanjay Kumar Madria,Günther Pernul,2003-06-29 This volume includes the papers accepted for the First International Conference on Electronic Commerce and Web Technologies which was held in Greenwich UK on September 4 6 2000 The conference is the first of a series of planned conferences on these topics with the goal to bring together researchers from academia practitioners and commercial developers from industry and users to assess current methodologies and explore new ideas in e commerce and web technology The conference attracted 120 papers from all over the world and each paper was reviewed by at least three program committee members for its merit The program committee finally selected 42 papers for presentation and inclusion in these conference proceedings The conference program consisted of 14 technical sessions and two invited talks spread over three days The regular sessions covered topics such as web application design intellectual property rights security and fairness distributed organizations web usage analysis modelling of web applications electronic commerce success factors electronic markets XML web mining electronic negotiation integrity and performance facilitating electronic commerce and mobile electronic commerce There were two invited addresses at the conference The first was by Anthony Finkelstein University College London UK on A Foolish Consistency Technical Challenges in Consistency Management This was a common address to the DEXA the DaWaK and the EC Web attendees The second talk was by Paul Timmers European Commission Information Technologies Directorate on The Role of Technology for the e Economy *Infrastructures for Virtual Enterprises* Luis M.
