

KINETIC THEORY & DIFFERENT STATES

Kinetic Theory explains the differences between the three states of matter.

solid

In solids, the particles have low kinetic energy and they are held together by intermolecular forces of attraction.

liquid

In liquids, the particles have more kinetic energy to stretch the intermolecular forces of attraction.

gas

In gases, the particles have enough kinetic energy to break all intermolecular forces of attraction.

Kleeman, 2017-12 Excerpt from A Kinetic Theory of Gases and Liquids In constructing a general Kinetic Theory the problem that presents itself first for investigation is the dependence of the velocity of translation of a molecule in a substance on its density and temperature It is often assumed that this velocity is the same in the liquid as in the gaseous state at the same temperature It can be shown however that this holds only for each molecule at the instant it passes through a point in the substance at which the forces of the surrounding molecules neutralize each other The total average velocity corresponding to the whole path of a molecule is usually much greater than the foregoing velocity in a liquid and dense gas on account of the effect of the molecular forces of attraction and repulsion About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works **Kinetic Theory of Liquids** Margaret Schlauch, 1955 *Kinetic Theory of Liquids* Iakov Il'ich Frenkel', 1947 **Kinetic Theory of Liquids** Jakov Il'ich Frenkel', 1946 Applications of the Kinetic Theory to Gases, Vapors, Pure Liquids, and the Theory of Solutions William Pingry Boynton, 1904 **Kinetic Theory of Liquids** Jakov I.
