Options Before and After Edentulism Yasemin Kulak Özkan,2024-11-21 This richly illustrated book presents different

implant supported overdenture application strategies to help clinicians face a widening range of possibilities in edentulous patients. Edentulism is generally correlated with a functional and esthetic challenge for the patient and brings psychological problems possibly affecting routine activities. Throughout the book, much attention is devoted to preventive prosthodontics, emphasizing the importance of any procedure that can delay or eliminate future prosthodontic problems. Overdenture is an important part of the preventive treatment modality. The introductory chapter of this book explains the theoretical and technical background as well as clinical considerations for overdenture. Different attachment systems for overdentures are then described in detail, covering stud attachments, bar attachments, magnetic and telescopic attachments. The final part of the volume focuses on the clinical evaluation parameters of an overdenture treatment, supporting tooth preparation and post treatment protocol. This book is a must have for all clinicians who treat complete denture patients. Two companion volumes covering treatment options before and after edentulism, including tooth supported overdentures and implant supported fixed restorations, are available separately.

Re-Write Duygu Balan, Yener Balan, 2023-04-13. Attachment theory based treatments including depth psychology, somatic psychology, holistic therapy, and Eye Movement Desensitization and Reprocessing (EMDR) are becoming even more popular and desired by clinicians, health systems, and the patients they care for. Up until recently, cognitive behavioral therapy and medication management were the mainstays for trauma-informed care, although we are witnessing a demand for a more somatic, holistic, and therefore deeper level of treatment to target attachment injury and change/re-write the trauma narrative. This book provides the response and tools to meet this current need. Due to the pandemic lockdowns and significant changes in our stability, the economy, sense of belonging, and community, there is a heightened level of triggering which has resulted in multifactorial trauma responses. The devastating traumatic impact spans nations, ages, and socioeconomic statuses. Unfortunately, domestic violence, child abuse, substance use, medical trauma, self-injury, suicide, and violence turned outwards have all increased significantly in the past two years. This workbook focuses on the healing journey of the trauma survivor, utilizing easy-to-use methodologies for long-lasting effects. It includes various exercises, writing prompts, coping mechanisms, and soothing techniques with the intention of allowing the person to create an individualized experience. This empowers the person to go in the order they choose, experiment with different techniques from different modalities, and find the ones that meet their needs the best. The authors also address generational trauma, societal trauma, and trauma at the family and individual levels, and their work can be used in conjunction with a clinical treatment plan or by the end user. *Re-Write: A Trauma Workbook of Creative Writing and Recovery in Our New Normal* employs practical strategies using evidence-based methodologies with psychological theory within a human-centered design framework.

Clayton,2020-03-17 How have conceptions and practices of sovereignty shaped how Chineseness is imagined This ethnography addresses this question through the example of Macau a southern Chinese city that was a Portuguese colony from the 1550s until 1999 As the Portuguese administration prepared to transfer Macau to Chinese control it mounted a campaign to convince the city s residents 95 percent of whom identified as Chinese that they possessed a unique cultural identity that made them different from other Chinese and that resulted from the existence of a Portuguese state on Chinese soil This attempt sparked reflections on the meaning of Portuguese governance that challenged not only conventional definitions of sovereignty but also conventional notions of Chineseness as a subjectivity common to all Chinese people around the world Various stories about sovereignty and Chineseness and their interrelationship were told in Macau in the 1990s This book is about those stories and how they informed the lives of Macau residents in ways that allowed different relationships among sovereignty subjectivity and culture to become thinkable while also providing a sense of why at times it may not be desirable to think them An Integrative Approach to Treating Babies and Children John
