Talk** Fernando J. Ballesteros,2010-08-12

For a long time I have been giving scientific lectures in different countries and on diverse topics generally related to astronomy and to my work at the Arecibo Observatory No matter which parti lar topic I am talking about the same question always comes up Have we had any contact at Arecibo with them My negative answer does not satisfy anyone In fact the answer either confirms their suspicions that there is a conspiracy afoot by higher autho ties not to release information or their intentions to deceive the general public The reasons for the deception have to do with the idea that as in the movie Contact the received messages contain important and useful information that will bring great advantage to whoever gets it Many of us want to believe that

extraterrestrial creatures can talk to us that perhaps they are even living among us as UFO fans believe It would be fascinating if it were true a more than extra dinary discovery the answer to an eternal question There is p sibly a deep psychological motive in this desire to know if we are alone in this huge universe and the need to believe in something beyond our limited world in space and time There is no doubt then that this topic brings with it many scientific and philosophical discussions as well as speculations that on many occasions fall into pure pseudoscience because of the lack of a reference framework

Creation: Facts of Life Dr. Gary Parker,2006-08-01 What happens when an evolutionary biologist is overwhelmed with scientific evidences of God s plan in nature After three years of trying to prove evolution to skeptical professors in his science department Gary Parker finally realized that the scientific evidence we see in God s world agrees with what we read in God s Word In Creation Facts of Life Dr Parker respectfully describes the evidences he once used to preach evolution but then he explains how the rest of the evidence points away from evolution and toward a perfect world created by God ruined by man restored to new life in Christ In easy to follow conversational style Dr Parker discusses DNA and genetics Life Before birth Mutations Adaptations Natural Selection Fossils The Geologic Column The Grand Canyon

The Politics of Evolution David F. Prindle,2015-04-10 The controversy over teaching evolution or creationism in American public schools offers a policy paradox Two sets of values science and democracy are in conflict when it comes to the question of what to teach in public school biology classes Prindle illuminates this tension between American public opinion which clearly prefers that creationism be taught in public school biology classes versus the ideal that science and only science be taught in those classes An elite consisting of scientists professional educators judges and business leaders by and large are determined to ignore public preferences and teach only science in science classes despite the majority opinion to the contrary So how have the political process and the Constitutional law establishment managed to thwart the people s will in this self proclaimed democracy Drawing on a vast body of work across the natural sciences social sciences and humanities Prindle explores the rhetoric of the evolution issue explores its history examines the nature of the public opinion that causes it evaluates the Constitutional jurisprudence that upholds it and explains the political dynamic that keeps it going This incisive analysis is a must read in a wide range of disciplines and for anyone who wants to understand the politics of biology
