Close Your Eyes to Find Your Way Jeffrey B. Brandt, 2009-04-03 Get to know yourself and you will come to know a miracle The author When you make a conscious decision to create a better life it is in that specific moment that the

quality of your life takes a leap for the better In this way the conscious mind expresses its power Keep in mind however it is the subconscious faculties of the mind that may either support or override that conscious decision In other words a conscious decision is short lived unless it becomes planted into the subconscious mind as your reality Understanding this is vital to the success of whatever program you use to better the quality of your life Welcome to a new understanding The very first chapter gets right into helping you with a simple effective exercise that actually brings you to a place of uncluttered consciousness This exercise is about letting go of all of our external baggage to find our essence This external baggage can include feelings inspired by our past programming and experiences the labels we use to identify who we are our emotions and the uncertainties we may have about our future Once this essence is revealed the book goes on to explore the different views that exist and how they can all be traced back to this same essence All conflict that exists between views thus is of a superficial nature All diversity that exists is on a superficial level and diversity is all a part of the grand scheme of nature Nature loves diversity And from uninhibited diversity balance is achieved It is when this balance is interrupted or even threatened that conflict results The book reminds us that in every case where conflict results that its cause can easily be traced back to superficial disharmony It is from this understanding that all answers are to be found by returning to this place of uncluttered consciousness Once the foundation for finding harmony is well established the focus of the book then shifts to defining and exploring the keys of success Almost without exception the stories of the most successful have been wrought with a period of self doubt or suffering prior to their success I have written a very special chapter to address this issue Essentially this is an inspirational chapter that can give strength during this frustrating time It is true there are numerous books on the market that treat the subject of personal growth The general consensus of these books is that we simply need to change our perspective to affect positive change in our lives Although they are right on in their advice and revealing in their explanations the common approach they teach has been purely intellectual The trouble with simply trying to maintain a more positive perspective with a purely intellectual approach is that it is so darn hard to avoid being exposed to opposite views Consider how we are literally inundated with negativity on a daily basis by the media friends family etc Like dieting simply trying to change our perspective doesnt work in the long run A purely intellectual attempt is a conscious attempt It excludes the subconscious mind where some ninety percent of our mental activity takes place including our habits Close Your Eyes is written in a way to inspire thought on a more profound level than simply intellectual It is written on an emotional level to connect with our feelings This emotional element is necessary for the information to take hold on a subconscious level In summary this book deals more with the journey itself to success It gives a unique perspective of what to expect along the way that other books tend to overlook For this reason I feel this book is unique and will fill a niche
