Resource Depression and Intensification During the Late Holocene, San Francisco Bay Jack M. Broughton, 1999-07-01

The Emeryville Shellmound on the east shore of San Francisco Bay was excavated and subsequently destroyed in the early twentieth century From its stratified deposits which span the period 2600 to 700 years ago the author identified 2 004 fish and 15 893 mammal specimens and analyzed these and 2 302 avian remains previously identified by Hildegard Howard in the 1920s A battery of independent tests derived from foraging theory supports the conclusion that human induced impacts on vertebrate populations caused declines in the efficiency of foraging across the time that the Emeryville locality was occupied

50 Years of Bat Research Burton K. Lim, M. Brock Fenton, R. Mark Brigham, Shahroukh Mistry, Allen Kurta, Erin H. Gillam, Amy Russell, Jorge Ortega, 2021-01-23 With more than 1 400 species bats are an incredibly diverse and successful group of mammals that can serve as model systems for many unique evolutionary adaptations Flight has allowed them to master the sky while echolocation enables them to navigate in the dark Being small secretive nocturnal creatures has made bats a challenge to study but over the past 50 years innovative research has made it possible to dispel some of the mystery and myth surrounding them to give us a better understanding of the role these animals play in the ecosystem The structure of the book is based on several broad themes across the biological sciences including the evolution of bats their ecology and behavior and conservation of biodiversity Within these themes are more specific topics on important aspects of bat research such as morphology molecular biology echolocation taxonomy systematics threats to bats social structure reproduction movements and feeding strategies Given its scope the book will appeal to the wider scientific community environmental organizations and government policymakers who are interested in the interdisciplinary aspects of biology and nature

Shorebird Ecology, Conservation, and Management Dr. Mark A. Colwell, 2010-11-16 Shorebirds are model organisms for illustrating the principles of ecology and excellent subjects for research Their mating systems are as diverse as any avian group their migrations push the limits of endurance and their foraging is easily studied in the open habitats of estuaries and freshwater wetlands This comprehensive text explores the ecology conservation and management of these fascinating birds Beginning chapters examine phylogenetic relationships between shorebirds and other birds and cover shorebird morphology anatomy and physiology A section on breeding biology looks in detail at their reproductive biology Because shorebirds spend much of their time away from breeding areas a substantial section on non breeding biology covers migration foraging ecology and social behavior The text also covers shorebird demography population size and management issues related to habitat predators and human disturbances Throughout it emphasizes applying scientific knowledge to the conservation of shorebird populations many of which are unfortunately in decline

Posing Questions for a Scientific Archaeology Terry L. Hunt, Carl P. Lipo, Sarah L. Sterling, 2001-06-30 Although many believe that archaeological knowledge consists simply of empirical findings this notion is false data are generated with the guidance of theory or some sense making system acting in its place

whether researchers recognize this or not Failure to understand the relationship between theory and the empirical world has led to the many debates and frustrations of contemporary archaeology Despite years of trying the atheoretical empiricist foundations of archaeology have left us little but a history of storytelling and unsatisfying generalizations about historical change and human diversity The present work offers promising directions for building theoretically defensible results by providing well designed case studies that can be used as guides or exemplars Evolutionary theory in at least some form is the foundation for a scientific archaeology that will yield scientific explanations for historical change *Fra Diavolo*
