**Hiring Geeks That Fit** Johanna Rothman, 2013-02-15 Do you want to hire great people Not sure how Read this book Knowledge workers your geeks are different from skill based staff So you should hire them differently You need to analyze your situation determine the problems you have understand your culture and then you can hire the right kinds of people Cultural fit is critical because we rarely fire people based on technical skill But we frequently fire them because of that elusive fit And that s an expensive proposition Hiring great geeks forces you to recognize and match culture non technical qualities preferences and skills and finally technical skills These people will adapt their knowledge to your specific situation the context They are the sum of both what they know and how they apply that knowledge to the product As a result one developer tester or technical manager is not interchangeable with another This makes hiring technical people one of the most critical and difficult processes a technical manager or team can undertake Hiring Geeks That Fit takes the guesswork out of hiring and reduces the risk of costly hiring mistakes You ll learn how to Develop a hiring strategy so you know how to solve your problem Analyze the job so the job description and ad falls out of the analysis I Source candidates using a variety of approaches including LinkedIn and Twitter Develop effective ads for different mediums Review resumes quickly to determine Yes No or Maybe candidates Develop behavior description questions and auditions Create phone screens that help you know who to bring in for an in person interview Make the most of an in person interview Check references Extend an offer that will attract a win win acceptance or tender a gentle but decisive rejection Create a great first day experience for new hires Learn how to create a buddy system to decrease the cost of a new hire What to do if you can t find someone You your team and your organization will live with the long term consequences of your hiring decision Investing the time for you and your team in how to hire and interview will pay off fast This book was written and produced entirely by the author We are proud to be distributing it

**Who Will Teach?** Richard Murnane, Judith D Singer, James Kemple, Randall Olsen, 2009-07-01 Will America find enough good teachers to staff its public schools How can we ensure that all our children will be taught by skilled professionals The policies that determine who teaches today are a confusing and often conflicting array that includes tougher licensing requirements higher salaries mandatory master's degrees merit pay and alternative routes to certification Who Will Teach examines these policies and separates those that work from those that backfire The authors present an intriguing portrait of America's teachers and reveal who they are who they have been and who they will be Using innovative statistical methods to track the professional lives of more than 50 000 college graduates the book describes in many cases for the first time just how prospective current and former teachers respond to the incentives and disincentives they face The authors a group of noted educators economists and statisticians find cause for serious concern Few academically talented college graduates even try teaching and many of those who do leave quickly never to return Current licensing requirements stifle innovation in training and dissuade many potentially talented teachers at the outset But Who Will Teach shows that we can reverse these trends if we get the incentives right Although better salaries are essential especially for new teachers money is not enough Potential teachers should be offered alternative paths into the classroom School districts should improve their recruiting strategies Licensing criteria should assess teaching skills not just academic achievement and number of courses completed The authors offer a promising strategy based on high standards and substantial rewards
