Kinematic Hydrology And Modelling:

Kinematic Hydrology and Modelling M.E. Meadows,D.J. Stephenson,1986-04-01 Requiring little mathematical background the book provides tools for hydraulic engineers and hydrologists concerned with estimating catchment runoff and floods It condenses widely spread research literature on the subject of kinematic hydrology and emphasizes basic principles so it should be of value to students and teachers in these areas The book is comprehensive and yet written in a basic way enabling practitioners to pick out relevant sections and apply them to real problems It also contains a valuable collection of charts and equations as well as simple computer programs for modelling catchment runoff and stream flow using the kinematic equations A wide spectrum of hydrological processes can be analyzed using the kinematic equations Overland flow stream flow and even groundwater flow can be studied A review of the assumptions behind the theory indicates where alternative equations are more accurate The book thus provides tools for hydrological simulation stormwater system design and catchment management It will be particularly useful for professors and students in postgraduate and senior years in hydrology and practicing engineers and hydrologists in stormwater flood and water resources fields

Research Programme,1984 **Recent Advances in the Modeling of Hydrologic Systems** D.S Bowles,P. Enda O'Connell,2012-12-06 Modeling of the rainfall runoff process is of both scientific and practical significance Many of the currently used mathematical models of hydrologic systems were developed a genera tion ago Much of the effort since then has focused on refining these models rather than on developing new models based on improved scientific understanding In the past few years however a renewed effort has been made to improve both our fundamental understanding of hydrologic processes and to exploit technological advances in computing and remote sensing It is against this background that the NATO Advanced Study Institute on Recent Advances in the Modeling of Hydrologic Systems was organized The idea for holding a NATO ASI on this topic grew out of an informal discussion between one of the co directors and Professor Francisco Nunes Correia at a previous NATO ASI held at Tucson Arizona in 1985 The Special Program Panel on Global Transport Mechanisms in the Geo Sciences of the NATO Scientific Affairs Division agreed to sponsor the ASI and an organizing

committee was formed The committee comprised the co directors Professor David S Bowles U S A and Professor P Enda O Connell U K and Professor Francisco Nunes Correia Portugal Dr Donn G DeCoursey U S A and Professor Ezio Todini Italy
