**The Tender Years** Jill Duerr Berrick,1998 The first few years of life are a time of unparalleled physical intellectual and emotional development But they can also be a time of neglect and abuse this is the period when children are most likely to suffer mistreatment by their parents and most likely to be placed in foster care Today most children entering the child welfare system are very young and in most large states infants are the largest group of children entering foster care each year Social service systems are typically not designed for very young children however and therefore fail to serve their special needs This shortcoming is significant because protecting very young children from physical harm is not enough they must also be protected from developmental harm The Tender Years is the first textbook to address this critical situation Beginning with an overview of child development theory it examines child abuse reporting patterns and discusses placement in foster care reunification and adoption It also looks at public child welfare practice featuring vivid examples of the children and families served by this system The authors analyze the differences between the foster care experiences of very young children and those of older children with special emphasis on the way the child welfare system deals with infants Based on a significant body of evidence regarding young children s unique affective physical and cognitive development this text illuminates the interrelationship of child welfare practice child development outcomes and public policy The authors offer a fundamental framework for decision making in child welfare when young children are involved and recommend specific changes in policy and practice aimed at moving the system toward greater developmental sensitivity Timely and provocative The Tender Years is essential reading for courses in child welfare social work with children and social work with the family as well as a valuable resource for child welfare administrators and policy makers

Miriam Grossman,2009-08-04 If you think sex education is still about the birds and the bees think again And it's not about science either In her shocking expos You're Teaching My Child What Dr Miriam Grossman rips back the curtain on sex education today exposing a sordid truth Today's sex ed programs aren't based on science they're based on liberal lies and politically correct propaganda that promote the illusion that children yes children can be sexually free without risk As a psychiatrist and expert on sexual education Dr Grossman cites example after example of schools and organizations whitewashing or omitting altogether crucial information that doesn't fit in with their PC agenda Instead sex educators only tell teens the facts of life that promote acceptance sexual exploration and experimentation What sex educators call an education scientists would call a scam Sex educators won't tell girls their bodies are biologically and chemically more susceptible to STDs they will only say 3 million girls have a sexually transmitted infection Educators say it's natural for children to explore their sexuality from a young age and only they can decide when it's right to have sex the real truth is neurobiologists say teen brains are not developed to fully reason and weigh consequences especially in the heat of the moment Teens are told condoms vaccines and yearly testing provide adequate protection without being told that studies now show condoms are no match for herpes HPV and gonorrhea In You're Teaching My Child What Dr Grossman reveals biological truths that you won't find in today's classrooms You're Teaching My Child What is critical reading for parents with teens and instrumental in teaching children the truth about sex **Attachment in Adulthood, First Edition** Mario Mikulincer,Phillip R.
