Crossley, Patricia Broadfoot, Michele Schweisfurth, 2007-01-24 Documenting major intellectual and paradigmatic changes in the field of comparative education in the light of the history and development of the journal *Comparative Education* this book compiles a selection of articles from forty years of the journal's distinguished history. It illustrates how changing times have been reflected in the nature and quality of published comparative research. Contributors explore the impact of key issues such as marketisation, accountability and globalisation upon policy and practice world wide. They explore how new challenges faced by the social sciences have seen shifts in the contexts, issues and priorities attended to by comparativists and how different approaches to comparative education have influenced the intellectual and professional identities and positioning of those involved. Bridging theoretically oriented scholarship with empirically grounded research relating to issues of policy and practice and with chapters addressing questions of relevance throughout the world, this book is an invaluable resource of ideas and stimuli for further thinking and research. **Development, Education and Learning in Sri Lanka** Angela W.

Little, 2024-06-13 Sri Lanka's early achievements in education and literacy became well known among the international development community in the middle of the last century and were often used to benchmark progress elsewhere. *Development Education and Learning in Sri Lanka* presents an illuminating narrative of changing education fortunes and inequalities based on half a century of research. This research journey was undertaken in collaboration with Sri Lankan researchers island wide in myriad communities, schools, classrooms and education offices through conversations with countless parents, teachers, students, community members, trade union officers, politicians and members of local, national and international development agencies as well as through extensive documentary analysis. The book delineates the distinctive and changing features of the Sri Lankan education system through comparisons with systems elsewhere through an understanding of national political, economic and social conditions, crises and upheavals through changes in education policy and through shifting patterns of opportunity among diverse social groups. These analyses are framed by themes in the international development discourse ranging from modernisation to basic needs to globalisation and sustainable development, some of which themes have been influenced by the Sri Lankan story. The book's overriding messages are the need to understand education and development in a country's own terms and to place learning at the heart of education policy, situating it within broader conceptions of the purpose, values and means of development. Praise for *Development Education and Learning in Sri Lanka* Through rigorous and comprehensive research and a blend of local and global perspectives, this book offers invaluable insights for academics and policymakers alike.
