Latin Linguistics And Linguistic Theory:

   Latin Linguistics and Linguistic Theory Harm Pinkster,1983-01-01 The articles of this collection on Latin linguistics are representative of the kind of research that is currently carried out in the field of linguistics Most deal with syntax or sentence structure but they vary with respect to their emphasis on theory or description They also vary with respect to the grammatical framework with which they are formulated with some preponderance of transformational generative approaches All papers are well informed about the major developments in contemporary linguistics and make extensive use of recent methods and types of argumentation In the introduction the volume editor briefly reviews the present state of Latin linguistics starting with a section on the question whether it is possible to conduct up to date linguistic research for Latin at all To be followed by a brief sketch of the impact of recent linguistic theories on Latin linguistics in general and in a final third section an outline is presented of the possible interest the contributions to this volume may have for linguists working on languages other than Latin   *Latin Linguistics and Linguistic Theory* ,1983   **Latin Linguistics and Linguistic Theory** Harm Pinkster,Universiteit van Amsterdam. Department of Latin,   *Latin Linguistics and Linguistic Theory* Harm Pinkster,1983   Latin Linguistics and Linguistic Theory Harm Pinkster,1983   **Linguistic Theory and the Romance Languages** John Charles Smith,Martin Maiden,1995-07-20 This volume contains revised versions of papers given at a conference at the Manoir de Brion in Normandy They deal with phonology morphology syntax and semantics and cover a wide range of Romance languages including many lesser known varieties The contributors to the volume are committed to the view that Romance Linguistics is not narrowly philological but is rather General Linguistics practised with reference to particular data The point has been made many times but is worth reiterating that Latin and the Romance languages offer an unrivalled wealth of synchronic and historical documentation and provide both a stimulus and a test bed for ideas about language structure language change and language variation Many of the papers in this volume can be interpreted simultaneously as using the analytical tools of linguistic theory to illuminate the structure of individual Romance languages or of the family as a whole and as using Romance data to throw light on general problems in linguistic theory or on the structure of languages beyond Romance Specific areas covered include prosodic domains quantification agreement the prepositional accusative clitic pronouns voice and aspect   Linguistic Studies on Latin József Herman,1994-09-01 The volume contains 26 articles 17 in English 9 in French selected from the papers presented at the 6th International Colloquim on Latin Linguistics organized in Budapest The authors share a common interest in applying to the study of Latin the conceptual framework of contemporary linguistics mainly but not exclusively the theoretical tools of functional grammar and of the newest trends in pragmatics Most studies envisage Latin in its synchronic functioning but some papers embrace diachronic processes from the archaic period to late and even pre Romance stages The volume is divided in several sections Phonology and Morpho syntax includes one paper on phonology Fr Biville and three on morphology G C L M Bakkum G

Haverling P Manuel Su rez Problems of the syntax of the simple sentence often in relation to word order phenomena are discussed in seven articles in Section 2 Ch Elerick H Fugier Jan R de Jong Marius Lavency E Rizzi and P Molinelli Hannah Ros n M H Somers The grammatical problems of the complex sentence were examined by a great many participants of the colloquium and the third section Subordination presents eight of those papers Gu Calboli P De Carvalho P Cuzzolin J Dangel S Mellet J A H Mensink P Ramat E Vester The section on text cohesion and particles an almost traditional field of research in new Latin linguistics includes papers by A M Bolkestein C Kroon R Risselada and M E Torrego The final section Problems of the Lexicon devoted to the historical comparative or semantic descriptive analysis of lexical elements contains four articles R Coleman B Garc a Hern ndez L Nadjo Chr Touratier An Index of Names closes the volume *Formal Linguistics and the Teaching of Latin* Giuliana Giusti,Rossella Iovino,Renato Oniga,2011-05-25 This volume offers a coherent collection of 26 papers presented at an international conference held in November 2010 exploring the latest achievements of formal and comparative linguistics applied to the teaching of Latin The three sections syntax and morphology semantics and pragmatics history and theory of teaching compare Latin with different ancient and modern languages aiming to represent grammar rules as the product of mental processes The book is addressed to linguists teachers and students who are looking for new perspectives to update their approach to classical Latin **Ellipsis and Reference Tracking in Japanese** Shigeko Nariyama,2003-11-24 In many East Asian languages despite the prevalent occurrence of implicit reference reference management is largely achieved without recourse to familiar agreement features For this reason recovering ellipted reference has been a perplexing problem in the analysis of these languages This book elucidates the linguistic mechanisms for ellipsis resolution in Japanese mechanisms which involve complex processes of inference that integrate grammatical sociolinguistic and discourse considerations with real world knowledge These processes are realised in an integrated algorithm the validity of which is tested against naturally occurring written texts This book also builds connections between theoretical linguistics and practical applications The findings not only have theoretical implications for identifying crucial factors in the linguistic encoding of implicitly expressed information factors which are very different from those found in European languages but also offer practical applications particularly for the design of machine translation systems and for learners of Japanese **On the Meaning of Prepositions and Cases** Silvia Luraghi,2003-11-17 Prepositions and cases constitute a fruitful field of research for semantics The historical development of their meaning can shed light on the relations among the semantic roles of participants and on the organization of conceptual space Ancient Greek allows an in depth study of such development The book based on a wide diachronically ordered corpus aims at providing a usage based analysis of possible patterns of semantic extension including the mapping of abstract domains onto the concrete domain of space An analysis of the Greek data further highlights the interplay between specific spatial relations and the internal structure of the entities involved and shows how case semantics may account for differences on the referential level rather

than merely express clause internal relations The first chapter contains a typologically based discussion of semantic roles which sets the language specific analysis in a wider framework showing its general relevance and applicability **Drawing the Boundaries of Meaning** Betty J. Birner,Gregory Ward,2006-11-29 One of the most lively and contentious issues in contemporary linguistic theory concerns the elusive boundary between semantics and pragmatics and Professor Laurence R Horn of Yale University has been at the center of that debate ever since his groundbreaking 1972 UCLA dissertation This volume in honor of Horn brings together the best of current work at the semantics pragmatics boundary from a neo Gricean perspective Featuring the contributions of 22 leading researchers it includes papers on implicature Kent Bach inference Betty Birner presupposition Barbara Abbott lexical semantics Georgia Green Sally McConnell Ginet Steve Kleinedler Randall Eggert negation Pauline Jacobson Frederick Newmeyer Scott Schwenter polarity Donka Farkas Anastasia Giannakidou Michael Israel implicit variables Greg Carlson Gianluca Storto definiteness Barbara Partee reference Ellen Prince Andrew Kehler Gregory Ward and logic Jerrold Sadock Francis Jeffry Pelletier Andrew Hartline These original papers represent not only a fitting homage to Larry Horn but also an important contribution to semantic and pragmatic theory *Gender, Language and Culture* Lidia Tanaka,2004-01-01 This book analyzes the relationship between gender age and role in Japanese television interviews It covers a wide range of topics on Japanese communication cultural and gender variables are interwoven in the interpretation of the findings The study shows how participants interact through language and how they project their identities in the context of the interview Based on a qualitative analysis speech in mixed and same gender interactions is analysed turntaking terms of address and aizuchi listener s responses are examined The findings reveal interesting characteristics of all female interactions such as the influence of age that appears to be more important than gender an observation that has repercussions in the study of gender and language differences in modern Japan This book is an interdisciplinary study that integrates notions of politeness and theories of gender and language and will be of interest to people researching Japanese culture and communication gender studies and institutional language **Communicative Organization in Natural Language** Igor? Aleksandrovi? Mel??uk,2001 The book defines the concept of Semantic Communicative Structure Sem CommS a formal object that is imposed on the starting Semantic Structure SemS of a sentence under text synthesis in order to turn the selected meaning into a linguistic message The Sem CommS is a system of eight logically independent oppositions 1 Thematicity Rheme vs Theme 2 Givenness Given vs Old 3 Focalization Focalized vs Non Focalized 4 Perspective Foregrounded vs Backgrounded 5 Emphasis Emphasized vs Non Emphasized 6 Presupposedness Presupposed vs Non Presupposed 7 Unitariness Unitary vs Articulated 8 Locutionality Communicated vs Signaled The values of these oppositions mark particular subnetworks of the starting SemS and thus allow for the distinction between sentences such as a A man killed a dog vs The dog was killed by a man b John washed the window vs It was John who washed the window or c It hurts vs Ouch The proposed Sem Comm oppositions are conceived as an attempt at sharpening the well

known notions of Topic Comment Focus etc Possible linguistic strategies for expressing the values of the Sem Comm oppositions in different languages are discussed at some length with linguistic illustrations **Grammaticization, Synchronic Variation, and Language Contact** Rena Torres Cacoullos,2000-01-01 This is a study of Old Spanish and present day Mexican The title develops a grammaticization account of the variation in progressive constructions The book looks at spatial expressions patterns of synchronic variation and register considerations amongst many other topics

Studies on German-language Islands Michael T. Putnam,2011 The contributions in this volume present cutting edge theoretical and structural analyses of issues surrounding German language islands or Sprachinseln throughout the world The individual topics of study in this volume focus on various aspects of these German language islands such as but not limited to phonological morphological syntactic semantic and pragmatic aspects of these languages under investigation Collectively the body of research contained in this volume explores significantly under researched topics in the fields of language contact and language attrition and illustrates how this on going research can be enhanced through the application of formal theoretical frameworks and structural analyses *Intonation Units in Japanese Conversation* Kazuko Matsumoto,2003-01-01 This book explores how speakers of Japanese organize their messages into coherent units as they jointly and interactively construct conversational discourse Specifically it investigates the syntactic informational and functional structures of intonation units IUs as basic units of discourse production and information flow in spoken communication It addresses various research topics clause vs phrase centrality relationship between IUs and clauses functions of independent NPs preferred argument clause structure and transitivity interrelationship among functional components and the role of new and interactional information in the shaping of IU syntax Overall it tries to elucidate not only the preferred IU structures that are typical of the way Japanese speakers talk in connected discourse but also possible relationships between the structures and their implications Besides three main chapters discussing the results of quantitative and qualitative analyses it also includes an introductory chapter comprehensively covering key issues in research on information flow in spoken discourse in general Thus the book will be useful to all students and researchers of functional linguistics and discourse analysis **From Indo-European to Latin** Helena Kurzová,1993-09-15 This study aims to describe the typological characteristics of the original Indo European structure called the derivative flectional stage or sub type and to trace its developments to the paradigmatically organized structure of the individual Indo European languages called the paradigmatic flectional stage or sub type This development is demonstrated in Latin a language characterized by highy developed inflection which attests especially by its verbal system an alternative way of paradigmatizing the original structure differing from Old Indian and Greek on which traditional reconstruction was based The notion of derivative flectional type is used to try to penetrate to the original form and historical sources of the IE flectional type without presupposing radical typological change between Proto IE and IE The author s view differs from the traditional theory of prehistoric change in IE structure from isolation to flection

via agglutination in that she assumes the origins of flection lie in lexico derivative categorization The book is divided into three parts 1 The Origins and Evolution of the Indo European Flectional Type 2 The Basic Principles and Origins of the Nominal System and Inflections 3 The Indo European Origins of the Latin Verbal System **Clause and Discourse** Lidewij van Gils,Caroline Kroon,Rodie Risselada,2020-01-20 These volumes assemble contributions presented at the XIX International Colloquium on Latin Linguistics in Munich 2017 They embrace essential topics of Latin linguistics with different theoretical and methodological approaches The volumes contain chapters on Latin lexicography etymology morphology phonology Greek Latin language contact Latin syntax semantics and discourse pragmatics **Discourse Across Languages and Cultures** Carol Lynn Moder,Aida Martinovic-Zic,2004-08-31 This volume brings together for the first time research by linguists working in cross linguistic discourse analysis and by second language researchers working in the contrastive rhetoric tradition The collection of articles by prominent authors and younger scholars encompasses a variety of research approaches and treats numerous naturally occurring spoken and written genres including conversations narratives academic expository writing journalism advertising and professional promotional texts Languages examined include English Spanish French Brazilian Portuguese Korean Japanese Chinese Hebrew Urdu Dutch Turkish and Serbo Croatian Taken individually and collectively the articles in this collection draw important conclusions concerning the roles of cognition multilingualism communities of practice and linguistic typology in shaping discourse within and across cultures

Subordination and Other Topics in Latin Gualtiero Calboli,1989-01-01 The papers in this volume are centered around the following topics subordination cases and prepositions moods tenses and voices of the verb nominal forms of the verb anaphors and pronouns word order theme and rheme negation style morphology and word formation
