Law Policy In Chinas Foreign Relations:

China's International Relations in the 21st Century Weixing R. Hu, Gerald Chan, Daojiong Zha, 2000-12-13 Most people believe China's foreign behavior is driven by its growing power status in world politics. Chinese leaders still firmly uphold some traditional values in foreign policy such as sovereignty, territorial integrity and national unification. However, it is often neglected that China's behavior is also shaped by its changing perception of the globalizing world and to a large extent is a result of external pressure on China. By examining the dynamics of paradigm shifts in China's foreign policy, thinking this book explores the ideological sources of China's international relations in the new century. With growing economic interdependence with the outside world which creates both constraints as well as incentives to adapt to the prevailing norms in contemporary international relations, authors of this volume analyze indigenous Chinese sources of intellect on the paradigm shifts. The concepts studied in this volume include national identity, nationalism, globalism, multilateralism, sovereignty and the role of international law in Chinese foreign policy. This volume helps to shed new light on how the dynamics of paradigm shifts affect China's behavior in international affairs.

Law, Policy, and Practice on China's Periphery Pitman B. Potter, 2010-09-13 This book examines the Chinese government's policies and practices for relations with the Inner Periphery areas of Tibet, Xinjiang and Inner Mongolia and the Outer Periphery areas of Hong Kong and Taiwan, focusing on themes of political authority, socio-cultural relations and economic development. China's history may be seen as one of managing the geographic periphery surrounding China proper. Successive imperial, republican and communist governments have struggled to maintain sovereignty over the regions surrounding the great river valleys of China. The importance of the periphery is no less real today: concerns over national security, access to natural resources and long-held concerns about relations between Han and other ethnic groups continue to dominate Chinese law, policy and practice regarding governance in the Inner Periphery regions of Inner Mongolia, Xinjiang and Tibet. In the Outer Periphery, Beijing sees engagement with the outside world, particularly the West, as inextricably tied to Chinese sovereignty over former foreign colonies of Hong Kong and Taiwan. Using the case study of national integration to indicate how policies are articulated and implemented through law and political/legal institutions, this book will be of interest to students and scholars of the peripheral regions. It will also appeal to academic and policy communities interested in legal reform in China.

China's Foreign Policy Contradictions Tim Nicholas Rühlig, 2022 China's rise to great power status is indisputable, but can it shape the future international order? This question remains widely debated because China's foreign policy is contradictory. Contrary to conventional wisdom, this book shows that China does not act from a position of strength but that foreign policy contradictions are the result of the domestic vulnerabilities of the ruling Chinese Communist Party. Providing exceptional insights into the considerations behind the opaque institutional structures of Chinese foreign policymaking and decision making, it shows that China will not provide a

model for a new international system but could undermine the existing order China's Foreign Relations and Security Dimensions Geeta Kochhar, 2018-03-19 China is the world's second largest economy and a key player in world politics. This book looks at China's foreign policy from a macro perspective. It analyses China's peripheral and regional policy as well as its relations with other major powers India and Russia. It offers insight into the historical security concerns of China and the linkages of internal domestic issues with external diplomacy which reshape its relations with neighbouring countries. The volume also examines President Xi Jinping's foreign policy orientations and aspirations for the future. In face of growing global concern on China's hegemonic ambitions in the region, the book gauges the tensions between China and Japan in the South China Sea as well as the apprehensions of several smaller Asian countries that may perceive China's strategic and geo-economic advantages and military strength as a threat. This book will be useful to scholars and researchers of China studies, politics, foreign policy, international relations, military and strategic studies, defence and security studies, area studies and political studies.

US-China Foreign Relations Robert S. Ross, Øystein Tunsjø, Dong Wang, 2020-10-15 This book examines the power transition between the US and China and the implications for Europe and Asia in a new era of uncertainty. The volume addresses the impact that the rise of China has on the United States, Europe, transatlantic relations and East Asia. China is seeking to use its enhanced power position to promote new ambitions; the United States is adjusting to a new superpower rivalry and the power shift from the West to the East is resulting in a more peripheral role for Europe in world affairs. Featuring essays by prominent Chinese and international experts, the book examines the US-China rivalry, the changing international system, grand strategies and geopolitics, foreign policy, geo-economics and institutions, and military and technological developments. The chapters examine how strategic security and military considerations in this triangular relationship are gradually undermining trade and economics, reversing the era of globalization and contributing to the breakdown of the US-led liberal order and institutions that will be difficult to rebuild. The volume also examines whether the adversarial antagonism in US-China relations, the tension in transatlantic ties and the increasing rivalry in Europe-China relations are primarily resulting from leaders' ambitions or structural power shifts. This book will be of much interest to students of Asian security, US foreign policy, European politics and International Relations in general.

The Chinese Dream and Law Shiping Hua, 2025-08-01 Analyzes the major laws promulgated during the Xi Jinping era against a background of the politics and ideology of the Xi regime in general. The Chinese Dream and Law study situates the Chinese Dream in the modern utopianism discourse since the Late Qing, following Kang Youwei and Mao Zedong. As a tool to promote the Chinese Dream, the legal reforms during the period depart from the thin constitutionalism of the first three decades of the post-Mao era and resemble aspects of Legalism. Although the current regime has made some progress in protecting people's socioeconomic rights through law, it has retreated on upholding judicial independence to protect people's civil and political rights, especially those vis-à-vis the state. The first three decades since post-Mao reform are an aberration that deviates from

the normal trajectory of modern Chinese political development The decade long efforts by the current regime have slowed the growing official corruption and have slightly narrowed the growing income gap although economic growth was cut in half The Chinese style of utopianism could mean a better place as in the country s ancient past It could also become a no place in the modern diverse world because this human hope that has a universal claim is often built on authoritarian means

Encounters between Foreign Relations Law and International Law Helmut Philipp Aust,Thomas Kleinlein,2021-06-03 Foreign relations law and public international law are two closely related academic fields that tend to speak past each other As this innovative volume shows the two are closely interrelated and depend on each other for their mutual construction and identity A better understanding of this relationship is of vital importance for upholding important constitutional values like democracy the rule of law and the protection of human rights while enabling states to engage in meaningful forms of international cooperation The book takes a close look at the encounters between the two fields and offers perspectives for a constructive engagement between the two Collectively the contributions argue that the delimitation between the two fields occurs in a hybrid zone of interaction which requires both bridges and boundaries bridges for the construction of the relationship between the two fields and boundaries for preserving key normative expectations of both domestic and international law This title is also available as Open Access on Cambridge Core
