Uncultivated Andy Brennan, 2019-06-17 The best wine book I read this year was not about wine Eric Asimov New York Times Today food is being reconsidered It's a front and center topic in everything from politics to art from science to economics We know now that leaving food to government and industry specialists was one of the twentieth century's greatest mistakes The question is where do we go from here Author Andy Brennan describes uncultivation as a process It involves exploring the wild recognizing that much of nature is omitted from our conventional ways of seeing and doing things our

cultivations and realizing the advantages to embracing what we've somehow forgotten or ignored. For most of us, this process can be difficult like swimming against the strong current of our modern culture. The hero of this book is the wild apple. *Uncultivated* follows Brennan's twenty-four year history with naturalized trees and shows how they have guided him toward successes in agriculture, in the art of cider making and in creating a small farm business. The book contains useful information relevant to those particular fields but is designed to connect the wild to a far greater audience skillfully blending cultural criticism with a food activist's agenda. Apples rank among the most manipulated crops in the world because not only do farmers want perfect fruit, they also assume the health of the tree depends on human intervention. Yet wild trees live all around us and left to their own devices they achieve different forms of success that modernity fails to apprehend. Andy Brennan learned of the health and taste advantages of such trees and by emulating nature in his orchard and in his cider he has also enjoyed environmental and financial benefits. None of this would be possible by following today's prevailing winds of apple cultivation. In all fields, our cultural perspective is limited by a parallel proclivity. It's not just agriculture; we all must fight tendencies toward specialization, efficiency, linear thought and predetermined growth. We have cultivated those tendencies at the exclusion of nature's full range. If *Uncultivated* is about faith in nature and the power it has to deliver us from our own mistakes, then wild apple trees have already shown us the way. The book for cider lovers. *New York Times*. Andy Brennan is a stubborn, thoughtful original and his apple memoir is powered by inspiring verve and irreverence. Loving apples or cider is not a prerequisite for loving this book. All that is needed is the willingness to follow a vibrant narrative voice driven by the pursuit of dreams. Alice Feiring, author of *Naked Wine* and *For the Love of Wine*.      **The Emerald Modem** Richard Leviton, 2004-05-04. Twenty years ago in England, author Richard Leviton discovered the planet. Following quite specific guidance, he began a long process that amounted to an apprenticeship. My mentors dispatched me to various specific locations in the Somerset landscape and at all hours of the night and day I sat on hills and valleys and rocks under sunlight, moonlight, rain, snow and fog and had visions. I started to see another landscape behind the apparent landscape. It was an apparitional landscape with stars, planets, galaxies, angels, spirits of Nature, mythic deities, divinity. As time went on, he found himself talking with angels, visiting celestial cities and following gnomes. He came to understand that at one level we are the planet and that both we and it have an intimate relationship with our galaxy. I found myself living inside the myths of the world as if they were expert scripts for real life inner adventures. I never once thought I was crazy. Why should I? Quite the opposite. I believed I was finally getting grounded in something real. But it would take me twenty years to make sense of it. That sense is embodied in *The Emerald Modem*. *The Emerald Modem* includes direct correspondences between human chakras and the Earth's energy features and the galactic original, listing locations of sacred sites around the planet where you may experience this relationship, explanations of world myths which provide clues to this unsuspected visionary world around us. This is the first book to synthesize all the fragments of geomantic perception, sacred sites, energy points.

vertexes etc into a global interactive model that ties human consciousness directly to it Leviton describes 85 subtle features in the planetary landscape places you can go for mystical experiences They are features of the Earth s energy body almost all invisible to conventional sight But psychic cognition can be trained and you can usefully interact with any of these types of sites today without seeing what you re doing Your intent to interact for the benefit of yourself and the planet is all that s required Just as modems dial us into the Internet so the features of the Earth s energy body described in The Emerald Modem help us get online with the galaxy You can learn to visit Grail Castles experience a Mount Olympus or walk through the stars in a landscape zodiac and you can learn enough to become confident that you re not traveling alone
