Doctors Serving People Edward J Eckenfels, 2008-08-01 Today s physicians are medical scientists drilled in the basics of physiology anatomy genetics and chemistry They learn how to crunch data interpret scans and see the human form as a set of separate organs and systems in some stage of disease Missing from their training is a holistic portrait of the patient as a person and as a member of a community Yet a humanistic passion and desire to help people often are the attributes that compel a student toward a career in medicine So what happens along the way to tarnish that idealism Can a new approach to medical education make a difference Doctors Serving People is just such a prescriptive While a professor at Rush Medical College in Chicago Edward J Eckenfels helped initiate and direct a student driven program in which student doctors worked in the poor urban communities during medical school voluntarily and without academic credit In addition to their core curriculum and clinical rotations students served the social and health needs of diverse and disadvantaged populations Now more than ten years old the program serves as an example for other medical schools throughout the country Its story provides a working model of how to reform medical education in America **Society's Choices** Institute of Medicine, Committee on the Social and Ethical Impacts of Developments in Biomedicine, 1995-03-27 Breakthroughs in biomedicine often lead to new life giving treatments but may also raise troubling even life and death quandaries Society s Choices discusses ways for people to handle today s bioethics issues in the context of America s unique history and culture and from the perspectives of various interest groups The book explores how Americans have grappled with specific aspects of bioethics through commission deliberations programs by organizations and other mechanisms and identifies criteria for evaluating the outcomes of these efforts The committee offers recommendations on the role of government and professional societies the function of commissions and institutional review boards and bioethics in health professional education and research The volume includes a series of 12 superb background papers on public moral discourse mechanisms for handling
