They examine the startlingly broad range of education policy changes enacted in Florida during Bush's first term including moves toward privatization with a voucher system, more government control of public education institutions with centralized accountability mechanisms and a superboard for all public education. The contributors arrive at a mixed conclusion regarding Bush's first term education policies while he deserves credit for holding students to higher standards, his policies have unfortunately pushed for equality in a very narrow way. The contributors remain skeptical about seeing significant and sweeping improvement in how well Florida schools work for all students.

This book explores how, why, and with what consequences one no longer excuses charter network marketizes teaching and learning through the author's 1000 hours of covert participant observation at a network charter school. In her research, Brooks found that the AAG pseudonym network re-conceptualized teaching by urging staff to envision their careers in corporate education rather than in classroom teaching. While some employees received a boost up the corporate ladder, others found themselves being pushed out of the organization. Despite AAG's equity-conscious discourse, administrators emphasized controlling student behavior as a central measure of teaching effectiveness. Brooks develops the concept of creative compliance to describe the most successful teachers' tactics for adhering to formal policies strategically bending the rules in order to survive and advance in a workplace fraught with competition and insecurity.
