Education Social Structure And Development:

Education, Social Structure and Development Bill Williamson, 1979-05-31 **Resources in Education**, 1995 **Social Structure and Mobility in Economic Development** Seymour Lipset, 2018-04-27

The foundation of this volume is the notion that the several processes of change constituting economic and social development are systematically interrelated. The essence of development is the appearance of rapid rates of increases in many different indices: output per capita, political participation, literacy, and the like. These quantitative changes are however commonly accompanied by vast changes in the social structure: markets emerge, political bureaucracies arise, and new educational systems appear. Written by the leading authorities on the subject, this group of papers tackles the causes and consequences of social mobility. Each author brings his particular skills to bear on various aspects of the problem: in studies of persons moving from rural to urban settings, from one kind of industry to another, and from one prestige level to another. Several of the papers review the theoretical and methodological issues involved in comparative research on social mobility, while others compare and contrast traditional and modern stratification systems. Various papers explore the economic, religious, and psychological basis of social mobility, concluding with enquiry into the consequences of rapid mobility, especially in terms of the political stability of developing nations. Because social mobility is a central consideration in any study of economic and social change, every student of change will use this pioneering reference source as a text for all future research. Contributors include: Otis Dudley Duncan, Harold L. Wilensky, Michael G. Smith, Bert F. Hoselitz, Wilbert E. Moore, Natalie Rogoff, Rams y Gideon Sjoborg, Reinhard Bendix, Harry Crockett, David Matza, Lester Seligman, and Gino Germani. Neil J. Smelser is emeritus professor, Department of Sociology, University of California, Berkeley. Seymour Martin Lipset was professor of sociology and director of the Institute of International Studies at the University of California, Berkeley.

This book bridges the gap between Education for Sustainable Development and community development and examines the contributions of critical environmental education as a theoretical framework to the policy research and practice of Education for Sustainable Development. The book investigates what Education for Sustainable Development really means when it happens from the perspectives of a marginalized individual at the very bottom of society in a local community where there is no such educational institution, no policy, or no curriculum to support the effort, but there is the necessity of learning and empowerment for changing the situation. In particular, drawing on the experience of the indigenous Ainu fisherman, it critically examines the theoretical foundation of Education for Sustainable Development, critical environmental education, investigating methodologically and epistemologically the relevance and efficacy of critical environmental education to socially critical approaches to Education for Sustainable Development in a community development context. And this investigation leads to develop a praxis framework.

The Role of Education in Societal Development Maria-Nefeli Oikonomou, 2018-10-26 This book examines the educational theories of John Dewey a US American philosopher and educator of the early 20th century and Paulo Freire a Brazilian pedagogue of the late 20th century and founder of the field of critical pedagogy It attempts to draw connections between their societal and educational concepts The focus of attention lies on the contribution of education to the development of society as it is analyzed in their works *Democracy and Education* and *Pedagogy of the Oppressed* The aim is to present in a comparative way a their perception of society in its historical and cultural context b their idea of society to which they aspire and c their conception of education as a response to societal conditions and as an instrument for achieving their societal idea The hermeneutical examination of their educational theories proves that although they have lived under different historical and cultural contexts they both highlighted the social dimension of education and its contribution to the formation of a democratic and humane society
