In Defense of American Higher Education Philip G. Altbach, Patricia J. Gumpert, D. Bruce Johnstone, 2001-09-05 The current era in higher education is characterized by increased need for accountability and fiscal constraint coupled with demands for increased productivity Higher education is expected to meet the demand of changing student demographics as well as requests for research and service from government and industry To preserve the academy's ability to meet these demands the editors and contributors to this volume argue that while change is inevitable and desirable any radical alterations to the practices that have established and upheld the excellence of higher education in the United States must be carefully considered The editors and contributors cherish the best ideals of higher education academic freedom commitment to both inquiry and teaching and preservation of an independence of mind and spirit in the face of external pressures At the same time the authors of these essays also reflect upon the failings of higher education including problematic historical legacies such as racism sexism and anti semitism In Defense of American Higher Education

is a careful analysis of what we have inherited undertaken with a critical eye for constructive reform It will be of interest to anyone concerned about the future of American higher education *A Report from the U.S. Study of Education in Japan*, 1987 **Understanding Education and Economics** Jessie Bustillos Morales, Sandra Abegglen, 2020-03-04 Understanding Education and Economics explores the multiple ways in which the field of education and schooling has become closely aligned with economic imperatives and interests and the impact of this on learning and teaching In particular the increasing influence of economic arguments economic ideologies and government involvement in education have made apparent that there is a need to reflect and talk about economic influences and trends in education Drawing on the expertise of educationalists around the world the book articulates key debates and theoretical perspectives which can give both students and staff across several courses within the study of education a framework for discussing and analysing how economics defines and shapes the nature and purposes of education The chapters offer discussions and reflections on key issues including the historical developments that led to the creation of a formal education system in England and Wales the ways in which neoliberalism underpins education including the coercion of education to serve economic needs the economics of the university as an institution Addressing philosophical sociological historical psychological and social issues in education and encouraging readers to pose questions about the nature of education this book is a valuable resource for students and staff alike and will allow them to broaden perspectives on what education could be for and what it should be for Between Truth and Falsity: Liberal Education and the Arts of Discernment Karim Dharamsi, David Ohreen, 2021-04-06 It seems we are awash in information From the moment we wake until we turn over our phones at night we are bombarded with images and messages news and information from a confounding number of sources But as the amount of information available to us increases ever more rapidly its quality and reliability seem less credible Russian troll bots 4chan Breitbart and Rebel Media challenge our credulity but they do so by mimicking aesthetic registers consumers expect of traditional media outlets Moreover traditional news sources both privately owned and public broadcasters already weakened by eroding revenue cuts to budgets and shifting demographics are under sustained attack from those who wish to damage their ability to hold powerful people to account Instead of a multi perspectival approach which seeks to report to the public the many ways to address a particular issue taking the reporter s role as neutral with regard to outcome fake or ideologically driven news sources compete for audience attention and faithfulness often using emotion to rally people toward a certain political cause or issue Academics meanwhile have their work attacked and undermined by people or groups seeking to advance political or economic interests They are told they too are political actors one more voice in a messy public arena instead of a font of reliable information and knowledge While academics continue to believe that their work at least in part enhances our understanding of the world and informs debate how do we know that their conclusions are indeed more reliable than their critics in the post truth era Between Truth and Falsity Liberal Education and the Arts of Discernment will aid academics and

students seeking to better grasp the value of liberal education within this post truth era It seeks to advance pedagogical ideas in order to fight factual erosion and reinforce intellectual capacities that are able to critically assess the chaos of information enveloping all segments of society This volume will therefore be of particular interest to academics and university educators working in higher education graduate students theorizing the nature of media and the role of higher education undergraduates studying liberal education and the nature of the university and those thinking about liberal education

World Yearbook of Education 2012 Gita Steiner-Khamsi, Florian Waldow, 2012-03-12 The phenomenon of travelling reforms has become an object of great professional interest and intensive academic scrutiny The fact that the same set of educational reforms is transferred from one country to another made scholars wonder whether policy transfer has increased as a result of globalization But also the fact that policy makers increasingly import best practices and international standards and use them as a tool to accelerate reform has captured the imagination of many that deal with policy studies An international comparative perspective is key for understanding why reforms travel from one corner of the world to another Not surprisingly the study of policy borrowing and lending constitutes one of the core research topics of comparative policy studies a new area of research that links comparative education with policy studies The World Yearbook of Education 2012 brings together a diverse range of perspectives on education policy through contributions from internationally renowned authors It reflects on the way policy borrowing and lending is reconfiguring the world of education and offers a new collection of insights into the changes occurring across the world It particularly focuses on The political and economic reasons for policy borrowing The agencies international networks and regimes that instigate policy change The process of borrowing and lending The impact of these systems agendas and institutions on indigenous settings This book will prove invaluable to researchers of globalization and to policy experts especially those interested in comparative and international educational studies It is also essential reading for undergraduate and postgraduate students and anyone involved in the sociology economy or history of education Gita Steiner Khamsi is Professor of Comparative and International Education at Teachers College Columbia University New York US Florian Waldow is Research Director at the University of Münster Germany

Breaking the Mold of Education for Culturally and Linguistically Diverse Students, Andrea Honigsfeld, Audrey Cohan, 2012-05-03 As editors of *Breaking the Mold of School Instruction and Organization Innovative and Successful Practices for the 21st Century* 2010 and *Breaking the Mold of Preservice and Inservice Teacher Education Innovative and Successful Practices for the 21st Century* 2011 we have explored innovative practices many of which represent issues of diversity from multiple perspectives and schools of thought As we have considered relevant factors problems and circumstances that influence effective education we most readily recognize that within the twenty first century issues of diversity have become even more profound This book the third in the *Breaking the Mold* series was conceptualized with the hope that by sharing compelling stories of successful innovation advocacy and social justice more children and their families

will be affected in positive ways The narratives presented in this volume are rooted in classrooms districts communities teacher preparation programs from around the United States and many corners of the world The unique initiatives portrayed here represent collaborative efforts by students teachers administrators professors parents boards of education and global citizens who believe in change and transformation for the betterment of education **Schools in Crisis** Carl Sommer,1984 The national educational crisis can be solved by practical yet inexpensive methods according to Carl Sommer Shortly after becoming a high school teacher he found serious limitations with the education his students received He probed into the reasons why some schools were successful even among traditionally low achieving children while so many others failed to provide students with a proper education He interviewed parents students teachers assistant principals and principals For 10 years he researched to find solutions for the problems facing American education One basic reason for the massive educational decline Sommer believes is that many administrators have embraced progressive policies such as not encouraging reasonable educational standards for both students and teachers lack of concern over students deficiency in the basics and permitting unqualified children to advance automatically from grade to grade Education Legislation, 1967 United States. Congress. Senate. Committee on Labor and Public Welfare. Subcommittee on Education,1967 **The Rise and Fall of Civic Education** Michael Learn,2024-09-16 Social studies is a field in crisis The crisis stems from failure to establish the very foundation of social studies purpose in public education civic education Social studies advocates have never put forth a coherent method for teaching civic education because policymakers and the public have been unable to agree upon a general definition of civic education This issue has disrupted the field since the early days As educators sought to include civic education within public schools as a dedicated field social studies evolved into a blending of history social sciences and civic education Social studies evolution never resolved the differences between the three with each discipline striving to control the narrative Instead of creating a unified field the disciplines devalued social studies and thus any discipline associated with it The Rise and Fall of Civic Education The Battle for Social Studies in a Shifting Historical Landscape investigates the changing definitions and purposes ascribed to social studies in the United States through time This result is viewed through the rising tensions from culture wars as America s divisive politics fight to control the narrative of the disciplines within social studies Problems Of Quality And Excel Lence In Education D.D. Aggarwal,2005 Education as a Social Institution and Ideological Process Mbukeni Herbert Mnguni, Africa and particularly South Africa is in a stage of creating an inclusive education system It is a necessary starting point to first recognize the voices of those who are excluded and marginalized and then to develop strategies which will ensure their inclusion Alternative Futures in American Education ,1972 World Yearbook of Education 2000 David Coulby,Robert Cowen,Crispin Jones,2013-01-17 With contributions from international authors this text demonstrates that education systems and what it is to be educated are in transition and that societies and economies are changing dramatically The contributors explore expanding university

The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a exceptional and suspenseful novel that will keep you wondering until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
