Critical Educational Psychology Stephen Vassallo, 2017-03-15 The field of critical studies recognizes that all knowledge is deeply embedded in ideological, cultural, political and historical contexts Although this approach is commonly applied in other subfields of psychology educational psychology has resisted a comprehensive critical appraisal In Critical Educational Psychology Stephen Vassallo seeks to correct this deficit by demonstrating how the psychology of learning is neither neutral nor value free but rather bound by a host of contextual issues and assumptions Vassallo invites educators, researchers and psychologists to think broadly about the implications that their use of psychology has on the teaching and learning process He applies a wide variety of interdisciplinary approaches to examine the psychology of learning, cognitive development, motivation, creativity, discipline and attention drawing on multiple perspectives within psychology and critical theory he reveals that contemporary educational psychology is entangled in and underpinned by specific political, ideological, historical and cultural contexts Book cover
