**Keepers of the Wolves** Richard P. Thiel, 2001 It was 1978 and there had been no resident timber wolves in Wisconsin for twenty years Still packs were active in neighboring Minnesota and there was the occasional rumor from Wisconsin's northwestern counties of wolf sign or sightings Had wolves returned on their own to Wisconsin Richard Thiel then a college student with a passion for wolves was determined to find out Thus begins *Keepers of the Wolves* Thiel's tale of his ten years at the center of efforts to track and protect the recovery of wolves in Northern Wisconsin From his early efforts as a student enthusiast to his departure in 1989 from the post of wolf biologist for the Department of Natural Resources Thiel conveys the wonder frustrations humor and everyday hard work of field biologists as well as the politics and public relations pitfalls that so often accompany their profession We share in the excitement as Thiel and his colleagues find wolf tracks in the snow howl in the forest night and are answered back learn to safely trap wolves to attach radio collars and track the packs ranges by air from a cramped Piper Cub We follow the stories of individual wolves and their packs as pups are born and die wolves are shot by accident and by intent ravages of canine parvovirus and hard winters take their toll and young adults move on to new ranges Believing he had left his beloved wolves behind Thiel takes a new job as an environmental educator in central Wisconsin but soon wolves follow By 1999 there were an estimated 200 timber wolves in 54 packs in Wisconsin This is a sequel to Dick Thiel's 1994 book *The Timber Wolf in Wisconsin The Death and Life of a Majestic Predator* That book traced the wolf's history in Wisconsin its near extinction and the initial efforts to reestablish it in our state Thiel's new book looks at how successful that program has been

*Wolves and the Wolf Myth in American Literature* S.K. Robisch, 2009-05-28 The wolf is one of the most widely distributed canid species historically ranging throughout most of the Northern Hemisphere For millennia it has also been one of the most pervasive images in human mythology art and psychology *Wolves and the Wolf Myth in American Literature* examines the wolf's importance as a figure in literature from the perspectives of both the animal's physical reality and the ways in which writers imagine and portray it Author S K Robisch examines more than two hundred texts written in North America about wolves or including them as central figures From this foundation he demonstrates the wolf's role as an archetype in the collective unconscious its importance in our national culture and its ecological value Robisch takes a multidisciplinary approach to his study employing a broad range of sources myths and legends from around the world symbology classic and popular literature films the work of scientists in a number of disciplines human psychology and field work conducted by himself and others By combining the fundamentals of scientific study with close readings of wide ranging literary texts Robisch astutely analyzes the correlation between actual living wolves and their representation on the page and in the human mind He also considers the relationship between literary art and the natural world and argues for a new approach to literary study an ecocriticism that moves beyond anthropocentrism to examine the complicated relationship between humans and nature

*The Politics of Global Climate Change* Patrick M. Regan, 2015-11-17 In 2009 the US House

of Representatives passed legislation requiring reductions in greenhouse gas emissions by 18 percent over the coming decade. Later that year President Obama went to Copenhagen to sign a treaty requiring reductions by 50 percent over a two decade period. The President came back with nothing, no firm commitment to reduce emissions and only a vague target to hold global temperature rises to under 2 C. How does a President who has a 75 vote majority in the House and a 19 vote majority in the Senate who has pre approval for a treaty reducing greenhouse gas production by 18 percent not achieve a treaty with at least the minimum goal of 18 percent reductions by 2020? Others have answered the puzzle by looking at institutional designs or negotiation dynamics. This book articulates a multilevel process that starts with local politics to explain how they can influence international negotiations and why President Obama's efforts in Copenhagen were doomed to fail. Understanding the role of local private interests can help form strategies for overcoming national resistance to climate change legislation and ultimately international agreements that could change the environmentally self destructive course we are on.

Man Writes Dog William Farina, 2014-04-04 Over the millennia many great writers from Pliny and Plutarch to C. S. Lewis and John Steinbeck have addressed diverse canine themes in their work usually in a broader human context. Late in the 20th century it was conclusively established by modern science that all dogs without exception are descended from wolves. Viewed through the dynamic lens of this new model the constantly evolving relationship between humankind and canines both wild and domesticated appears more complex and intertwined than ever before. This survey reviews what 20 selected authors from the Western tradition have had to say on the same subject matter leading up to our present times.

Recovery of Gray Wolves in the Great Lakes Region of the United States Adrian P. Wydeven, Timothy R. van Deelen, Edward Heske, 2009-02-27 In this book we document and evaluate the recovery of gray wolves *Canis lupus* in the Great Lakes region of the United States. The Great Lakes region is unique in that it was the only portion of the lower 48 states where wolves were never completely extirpated. This region also contains the area where many of the first modern concepts of wolf conservation and research were developed. Early proponents of wolf conservation such as Aldo Leopold, Sigurd Olson and Durward Allen lived and worked in the region. The longest ongoing research on wolf prey relations see Vucetich and Peterson Chap 3 and the first use of radio telemetry for studying wolves see Mech Chap 2 occurred in the Great Lakes region. The Great Lakes region is the first place in the United States where Endangered wolf populations recovered. All three states Minnesota, Wisconsin and Michigan developed ecologically and socially sound wolf conservation plans and the federal government delisted the population of wolves in these states from the United States list of endangered and threatened species on March 12, 2007 see Refsnider Chap 21. Wolf management reverted to the individual states at that time. Although this delisting has since been challenged we believe that biological recovery of wolves has occurred and anticipate the delisting will be restored. This will be the first case of wolf conservation reverting from the federal government to the state conservation agencies in the United States.

*The Timber Wolf in Wisconsin* Richard P. Thiel, 1993 In early 1958 in the far

northern town of Cornucopia Wisconsin's last timber wolf was accidentally run over by an automobile The humane intention to end the animal's suffering produced a grisly aftermath the wolf survived the impact of the car was bludgeoned with a tire iron twice but survived and finally had its throat slit with a restaurant knife This horrifying scene is certainly an apt if appalling symbol of the timber wolf's early fate in Wisconsin Feared detested hunted down for state authorized bounties the animal was systematically exterminated as an enemy of man and progress Yet this bleak chapter in the history of conservation has a happier ending Seventeen years later in 1975 the timber wolf had officially reestablished itself and as a protected species is now flourishing under the care of Wisconsin's Department of Natural Resources Few can be more caring than the author a DNR educator in wildlife management As an inquisitive teenager Richard Thiel began his pursuit of the Wisconsin timber wolf's story in the mid 1960s and has been at it ever since The result is this arresting intensely readable book a story of fear mistrust and misunderstanding that ends thankfully as one of hope and appreciation *Wisconsin Natural Resources*, 2012 Wisconsin Magazine of History Milo Milton Quaife, Joseph Schafer, Edward Porter Alexander, 2002 *Land Economics*, 1948 *International Wolf*, 2003 **Conservation Pioneers** William H. Tishler, Erik M. Gheno, 2003 **The Publishers Weekly**, 2001 **Choice**, 2002 *Library Journal*, 2002 Includes beginning Sept 15 1954 and on the 15th of each month Sept May a special section School library journal ISSN 0000 0035 called Junior libraries 1954 May 1961 Also issued separately Kliatt Young Adult Paperback Book Guide, 2002 **American Book Publishing Record**, 2002 Endangered Species Update, 2004 **The British National Bibliography** Arthur James Wells, 2003 *Book Review Digest*, 2002 **Forthcoming Books** Rose Arny, 2001-08
