Nichols, David C. Berliner, 2007-03-01 Drawing on their extensive research Nichols and Berliner document and categorize the ways that high stakes testing threatens the purposes and ideals of the American education system For more than a decade the debate over high stakes testing has dominated the field of education This passionate and provocative book provides a fresh perspective on the issue and powerful ammunition for opponents of high stakes tests Their analysis is grounded in the application of Campbell s Law which posits that the greater the social consequences associated with a quantitative indicator such as test scores the more likely it is that the indicator itself will become corrupted and the more likely it is that the use of the indicator will corrupt the social processes it was intended to monitor Nichols and Berliner illustrate both aspects of this corruption showing how the pressures of high stakes testing erode the validity of test scores and distort the integrity of the education system Their analysis provides a coherent and comprehensive intellectual framework for the wide ranging arguments against high stakes testing while putting a compelling human face on the data marshalled in support of those arguments **Excellence in Education** Sir Cyril Taylor, Conor Ryan, 2013-10-17 A thorough examination of the characteristics of a high performing school written by Sir Cyril Taylor Chairman of the Specialist Schools Trust and Conor Ryan senior adviser to Tony Blair on Education *Excellence in Education* Cyril Taylor, Conor Ryan, 2013-05-13 A thorough examination of the characteristics belonging to a high performing school this book is written by the Chairman of the Specialist Schools Trust and the education advisor to the Prime Minister Tony Blair It draws on numerous case studies of successful schools as well as showing how previously failing schools have been turned around Looking at such areas as leadership staffing target setting discipline and order curriculum innovation and individual learning the book offers a blueprint to head teachers and others trying to develop excellent schools Renewal Harold Kwalwasser, 2012 Harold Kwalwasser has put together a call to action for education reform that makes a clear case for what has to be done in order to educate all children to their full potential He visited forty high performing and transforming school districts charters parochial and private schools to understand why they have succeeded where others have failed The analysis in *Renewal Remaking America s Schools for the Twenty First Century* brings together all of the necessary changes in one dynamic strategy Many schools even though facing seemingly impossible odds have succeeded brilliantly But their histories also reflect that there are neither silver bullets or demons The heart of successful reform is systemic change which requires the patience understanding and commitment of every adult who has a role in the process from parents and

taxpayers to the school board members superintendents and teachers and on to state legislators and members of Congress Renewal offers a clear picture of how to move away from the mass production style of education that most schools offered throughout the twentieth century to a new more innovative and flexible model that can meet this country's promise of truly educating every child and preparing each of them for the challenges ahead *You Can't Do It Alone* Jean

Johnson, 2011-12-16 Experts and reformers have suggested many promising ideas for improving schools and ramping up student learning but in too many cases proposals for change run up against resistance confusion and anxiety from key stakeholders such as teachers parents students and members of the broader public To propel change and to sustain it school leaders need to understand what is driving these responses and develop more effective strategies for engaging these groups in the mission of reform *You Can't Do It Alone* provides school leaders with a crisp summary of opinion research among teachers parents and the public conducted by Public Agenda Education Sector and other respected analysts It offers tips on what leaders can do to more successfully engage these groups in areas such as reforming teacher evaluation turning around low performing schools and building support for world class standards The book also introduces a theory of change and public learning developed by social scientist Daniel Yankelovich along with some practical rules of the road for promoting the kind of dialogue that leads to consensus and action
