Neutral Europe and the Creation of the Nonproliferation Regime Pascal Lottaz,Yoko Iwama,2023-11-03 Lottaz Iwama and their contributors investigate the role of neutral and nonaligned European states during the negotiations for the Treaty on the Nonproliferation of Nuclear Weapons NPT Focusing on the years from the Irish Resolution of 1958 until the treaty s opening for signatures ten years later the nine chapters written by area experts highlight the processes and reasons for the political and diplomatic actions the neutrals took and how those impacted the multilateral treaty negotiations The book reveals new aspects of the dynamics that lead to this most consequential multilateral breakthrough of the Cold War In part one three chapters analyze the international system from a bird s eye perspective discussing neutrality nonalignment and the nuclear order The second part features six detailed case studies on the politics and diplomacy of Ireland Sweden Finland Switzerland Austria and Yugoslavia Overall this study suggests that despite the volatile and dangerous nature of the early Cold War the balance of the strategic environment enabled actors that were not part of one or the other alliance system to play a role in the interlocking global politics that finally created the nuclear regime that defines international relations until today A valuable resource for scholars of nonproliferation the Cold War neutrality nonalignment and area studies The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license

*Contemporary Strategy* John Baylis,Ken Booth,John Garnett,Phil Williams,2021-01-26 This book first published in 1975 is a comprehensive examination of specialised strategic studies and deals with the theoretical and policy aspects of the topic It argues that military power is an intrinsic part of the international system with strategy being the means by which military power may be used to achieve political objectives Hence given the destructiveness of modern weapons it is the prime aim of the strategic doctrines of the major powers not to wage war but to use their military potential to further their interests by less catastrophic means However outside the Cold War superpower confrontation strategy exhibits many of its traditional aspects This book analyses both types of strategy variations

*International Negotiations: A Bibliography* Amos Lakos,2019-02-22 The international system comprises a plurality of sovereign states often pursuing conflicting interests One means of resolving or managing conflicts between those states is diplomatic bargaining or negotiation In the last fifteen years the study of negotiation has attracted researchers from various disciplines in the social sciences and the vol

Prohibition of Nuclear Weapons: The Relevance of International Law Elliott Meyrowitz,2025-02-03 The United States is the only nation to have used nuclear weapons in warfare and claims not only through its State Department but through a Congressional vote as late as 1999 that the use of nuclear weapons is lawful Can such a claim with its undeniable assurance of the greatest degree of destruction of life and property this planet will ever have seen be sustained The author investigates this question as a prelude to a more extensive inquiry into the options of legal scholars on the legal status of nuclear weapons and international law Published under the Transnational Publishers imprint

**Historical Dictionary of Arms Control and Disarmament** Jeffrey Arthur

Larsen, James M. Smith, 2005 *Historical Dictionary of Arms Control and Disarmament* provides a historical review of key themes and issues in international security and arms control focusing on efforts in the 20th century to control the spread and use of armaments and to prevent war. This book summarizes the rich and proud traditions of arms control and disarmament, their critical role in ensuring a non-catastrophic course throughout history, especially the dangerous period of the Cold War, and their continuing relevance and role in the emerging post-Cold War world. It also seeks to reinforce a broad perspective of key terms in order to capture the scope and range of their application yesterday, today, and tomorrow. Given this combined tradition and focus, this Dictionary serves two purposes. As a historical dictionary, it chronicles key terms, personalities, events, and agreements as a ready reference from which to launch a more extensive investigation. But it also seeks to capture the breadth of current and future applications by presenting the vocabulary of traditional and non-traditional approaches. The book includes a large dictionary of more than 1,000 key terms, as well as a comprehensive bibliography divided into multiple categories, an extensive chronology, and a timeline. This book can also serve as a useful desk reference for the policy practitioner. The pace and intensity of the practice of arms control often eliminates the luxury of conventional study of past or related arms control efforts. The dictionary seeks to provide a relevant sampling of treaty and agreement details and of the specific terms of reference of arms control to allow productive progress in a policy work environment. Researchers and students will also find the dictionary to be a useful reference tool. Much of the formal literature in the field, such as treaty texts and policy pronouncements, is written in technical language without elaboration. Also, many references to agreements are posed in shorthand, intended only for the policy practitioner.

**Disarmament, a Select Bibliography, 1973-1977** Dag Hammarskjöld Library, 1978      *Air University Library Index to Military Periodicals*, 1973      **Foreign and Commonwealth Office, Accessions to the Library, May 1971-June 1977: Author catalogue** Great Britain. Foreign and Commonwealth Office. Library, Great Britain. Ministry of Overseas Development. Library, 1979      Citizens Against the MX Matthew Glass, 1993. In late 1979, President Jimmy Carter approved the deployment of the MX weapons system, dubbed "Man's largest project across millions of acres of Great Basin land in Nevada and Utah." Officials sought to enlist citizen support with offers of jobs and calls for patriotic sacrifice. A coalition of ranchers, environmentalists, Western Shoshones, and Mormons battled with words and protest for two years to keep the weapons system out of their homelands. Drawing on interviews and records of involved organizations, Matthew Glass recounts the story of the citizens' struggle against the national security bureaucracy. He applies the critical social theory of Jürgen Habermas to show how the coalition's discourse differed from that of other antinuclear groups, undercutting in the process the role nuclear weapons have often played within the civil religion of American nationalism, a fact that may have contributed to the movement's success.
