and the immune-interaction of the lung-brain axis, volume II Jialin C. Zheng,Ping Yuan,Xiaohuan Xia,Wen-Hui

Wu,Danchen Wu,Yi Yan,2025-07-31 This Research Topic is the second volume of the Inflammation in Respiratory and Neurological Diseases and the immune interaction of the lung brain axis Community Series Please see volume I here Despite great advances in diagnosis and treatment that we have witnessed in the last decades over a billion people suffer from both respiratory and neurological diseases each year which poses great threats to public health and economic burden worldwide In many instances the underlying pathogenic mechanisms are still poorly understood which significantly limits the efficacy of therapeutic methods In this regard lines of evidence pinpoint the important role of immunity and inflammation in both respiratory disorders e g pulmonary hypertension chronic obstructive pulmonary disease asthma etc and neurological ones e g neurodegenerative diseases stroke depression etc The accumulation of inflammatory cells and an excess of cytokines and chemokines at the inflammatory site would result from the disturbance of the body s delicate balance between immunity and tolerance Therefore it gives rise to chronic inflammation and autoimmunity underlying the development of both lung and neurological diseases Furthermore the inflammation interaction between lung and brain has been identified suggesting the existence and importance of the lung brain axis in the regulation of immune responses in the lung and brain that contribute to the onset and progression of both respiratory and neurological diseases Nevertheless inflammatory or immunity related risk factors as well as novel targets and therapies against inflammation or immunity help early diagnosis and treatment of respiratory and neurological diseases At present the full picture of the molecular mechanisms of how immuno inflammatory activation and the immune cells orchestrate the tissue remodeling leading to respiratory and neurological diseases remains unclear The identification of inflammatory molecules as therapeutic targets or biomarkers are worth further scrutiny to halt the disease progression and monitor the therapeutic interventions The goal of this Research Topic is to provide an overview of the immunomodulatory mechanisms novel targets and therapies against the inflammatory mediators the inflammatory interaction between lung and brain as well as inflammation related risk factors in respiratory and neurological diseases It will enhance our comprehension of immunity as a crucial player in the crosstalk between the lung and brain under

physiological and pathological conditions We welcome the submission of Review Original Research articles and Clinical Trial data that cover but are not limited to the following topics 1 Immunity and inflammation related mechanisms in respiratory and neurological diseases 2 Novel targets against inflammation or immunity in respiratory and neurological diseases 3 Novel therapies e g exosomes engineered immunomodulatory agents nanomaterials against inflammation or immunity in respiratory and neurological disorders 4 The inflammatory interactions of lung and brain under physiological and pathological conditions 5 The identification of inflammation or immunity related risk factors traditional and genetic contributing to respiratory and neurological diseases for the development of novel biomarkers for disease diagnosis and prognosis

Mental Illness, Culture, and Society: Dealing with the COVID-19 Pandemic, volume VIII Mohammadreza Shalbafan, Samer El Hayek, Renato de Filippis, 2024-06-21 The COVID 19 outbreak has impacted many areas of our lives including mental health Lockdown and physical distancing measures have been one major effective intervention to counter the spread of the virus and reduce the impact of the disease However they have negatively impacted mental well being and behaviors either triggering the onset of new psychiatric symptoms and diseases or amplifying pre existing ones The pandemic and lockdown measures have also been associated with reduced access to treatment and facilities all over the world further worsening mental health outcomes The impact on mental health although universal varied between nations Cultural and societal variables including norms values religion and stigma have played an important role in shaping COVID 19 related mental health symptoms including anxiety depression grief psychosis and addiction These sociocultural factors

have also molded how mental health interventions are tailored and provided Highlighting the intertwining relationship between the pandemic mental health and sociocultural factors are essential to managing emerging mental health symptoms adequately *Navy Photographer's Mate Training Series* Tom Regina,1983 **Community Series In**

Baig,Syed Faisal, Suraj P. Parihar,2025-08-18 Protein protein interactions PPIs are involved in almost every cellular process They represent attractive targets for modulating signaling pathways leading to disease states However they are challenging to target with small molecules peptides for example due to varied reasons Although a growing number of PPIs have become validated drug targets there is only a little percentage of them have been used to successfully design potent drugs PPIs play an important role in signaling events

leading to inflammation Many inflammatory diseases are solely based on specific signaling pathways inside the cells which are in turn driven by a prior event of a protein protein interaction or several protein protein interactions It has been clearly shown by many investigators across the world that targeting such interactions would be the best way to attenuate the signaling events and eventually the inflammation In the last few years various PPIs modulators have entered clinical studies some of which have been approved for marketing strengthening our idea that modulators targeting PPIs have broad prospects in clinical research The conventional methods using medicinal chemistry protocols are less effective and time consuming for designing and identifying PPI modulators Thus it is necessary to develop more effective approaches for screening the PPI modulators A wide variety of strategies including High throughput screening HTS in silico modeling and the most recent Artificial Intelligence AI could multiply the results in terms of time and effort We would like to invite potential authors researching on topics associated with studies focused on the role of protein protein interactions as well as targeting those in inflammatory signaling leading to multiple diseases including sepsis etc Articles specifically encompassing the following are welcome 1 Artificial Intelligence AI in PPI based drug discovery in immune mediated inflammatory disease 2 Novel cell based high output assays for quicker screening of novel drugs against PPI s in immune mediated inflammatory disease 3 Novel PPI s and their therapeutic targeting in inflammation and sepsis Please note Bioinformatics or Computational Analysis of public genome or transcriptome databases need to be accompanied by robust and relevant validation to be submitted to this section Manuscripts describing the pharmacological action of drugs used in traditional medicine in models of disease are not in scope of this Research Topic unless they have a strong focus on the immune system This Research Topic is the second volume of the Community Series in Targeting Signalling Pathways in Inflammatory Diseases Please see the first volume here **Community Series in Towards Precision Medicine for Immune-Mediated Disorders: Advances in**

Using Big Data and Artificial Intelligence to Understand Heterogeneity in Inflammatory Responses, volume II

Alex Tsoi,Xu-jie Zhou,Yasmina Laouar,2025-01-27 The ability to understand the underlying mechanisms that drive the heterogeneity in inflammatory responses among patients suffering from immune mediated conditions is critical The nature of the immune mechanism ranges from the degree of immune cell activation to the HLA genotypes and the intensity of responses of target tissues to cytokines High throughput experiments have generated significant information for us to facilitate the identification of disease associated components for different complex immune mediated conditions e g psoriasis lupus rheumatoid arthritis inflammatory bowel diseases and the advances in biotechnologies and efficiency in computational resources have further promised cost effective opportunities to simultaneously study the different aspects in the basic and translational domains of these human diseases The critical questions we face are to provide efficient inference to integrate these datasets and translate what we have learned from the disease associated components to understand the heterogeneity e g ethnic gender genetic differences in disease manifestation and prognosis of these immune mediated conditions

Translating and integrating big data to understand the intrinsic factors that shape the different unique natures of inflammation processes require an efficient and flexible framework to incorporate signatures of different types

FAQs About Editing Series Books

What is a Editing Series PDF? A PDF (Portable Document Format) is a file format developed by Adobe that preserves the layout and formatting of a document, regardless of the software, hardware, or operating system used to view or print it. **How do I create a Editing Series PDF?** There are several ways to create a PDF: Use software like Adobe Acrobat, Microsoft Word, or Google Docs, which often have built-in PDF creation tools. Print to PDF: Many applications and operating systems have a "Print to PDF" option that allows you to save a document as a PDF file instead of printing it on paper. Online converters: There are various online tools that can convert different file types to PDF. **How do I edit a Editing Series PDF?** Editing a PDF can be done with software like Adobe Acrobat, which allows direct editing of text, images, and other elements within the PDF. Some free tools, like PDFescape or Smallpdf, also offer basic editing capabilities. **How do I convert a Editing Series PDF to another file format?** There are multiple ways to convert a PDF to another format: Use online converters like Smallpdf, Zamzar, or Adobe Acrobats export feature to convert PDFs to formats like Word, Excel, JPEG, etc. Software like Adobe Acrobat, Microsoft Word, or other PDF editors may have options to export or save PDFs in different formats. **How do I password-protect a Editing Series PDF?** Most PDF editing software allows you to add password protection. In Adobe Acrobat, for instance, you can go to "File" -> "Properties" -> "Security" to set a password to restrict access or editing capabilities. Are there any free alternatives to Adobe Acrobat for working with PDFs? Yes, there are many free alternatives for working with PDFs, such as: LibreOffice: Offers PDF editing features. PDFsam: Allows splitting, merging, and editing PDFs. Foxit Reader: Provides basic PDF viewing and editing capabilities. How do I compress a PDF file? You can use online tools like Smallpdf, ILovePDF, or desktop software like Adobe Acrobat to compress PDF files without significant quality loss. Compression reduces the file size, making it easier to share and download. Can I fill out forms in a PDF file? Yes, most PDF viewers/editors like Adobe Acrobat, Preview (on Mac), or various online tools allow you to fill out forms in PDF files by selecting text fields and entering information. Are there any restrictions when working with PDFs? Some PDFs might have restrictions set by their creator, such as password protection, editing restrictions, or print restrictions. Breaking these restrictions might require specific software or tools, which may or may not be legal depending on the circumstances and local laws.
