Education And Community:

Community Schools JoAnne Ferrara, Reuben Jacobson, 2019-05-24 Ferrara Jacobson and their colleagues illuminate how community schools become a comprehensive place based strategy that both supports high quality teaching and learning and addresses out of school barriers to success *The Educative Community* Roger Hiemstra, 1972 This book has been created to meet the basic needs of future teachers educational specialists parents and those citizens who desire to become better informed on current educational concepts and practices Eight chapters discuss the nature of the community the activation of the educative community the community school and community education the modern family s educational needs in light of the changing family structure community coordination and cooperation processes for community change community investments in education and higher education and the community School and Community Edward Gustave Olsen, 1958

Community Education, an Agenda for Educational Reform Garth Allen, 1987 Community Education for Social Justice Cameron White, 2014-02-05 What is community How important is community in the 21st century Where might the idea of community fit in education and schooling teaching and learning These are the questions and themes embedded in this book The general critique is that community is an add on in our schools and often is dismissed as a result of the individualistic and competitive nature of schooling today Our focus is to provide critical investigations as to the possibility of community and that we need community now more than ever The concept of community education brings many ideas and issues to mind Related themes include place based field based environmental service learning and outdoor education Each has its own more narrow focus with community education perhaps an umbrella term than encompasses them all Nevertheless the suggestion here is that instead of community education serving as an extension or add on to traditional approaches it should be the focus of all education What is often missing in teaching and learning are contexts and connections that make education meaningful Community education engages participants in problem and issues based approaches to the local community thereby facilitating that local to global link Instead of compartmentalized subjects integrated approaches use what students and the community know or understand to develop further questions solutions or even problems Community education offers efficacy in that it provides opportunities for collaboration in addressing local issues and problems It enables the community to become the classroom thus ensuring a more long term connection to active rather than passive endeavors as citizens
