Resources in Education ,1999 **Liberal Education and Democracy** Bob Pepperman Taylor,2025-05-15 Liberal Education and Democracy addresses three vital arguments for liberal education and its integral relationship to democracy Liberal education is currently under attack as both politically subversive and economically impractical In Liberal Education and Democracy Bob Pepperman Taylor evaluates both the defenses that have been offered for liberal education and the complex relationship between liberal education and democracy He offers a compelling case for maintaining a strong commitment to this form of education as an essential good for all citizens His three primary arguments for liberal education are that it prepares students to be useful contributors to the economy that it prepares citizens to be thoughtful and responsible and that it can stimulate students to experience the delight of intellectual exploration and understanding Taylor moves through each of these arguments and concludes that the seemingly least practical of them may in fact be the most powerful He gives an insightful glimpse into the current democratic climate and through thorough examination argues that democracies need liberal education as much as liberal learning requires the freedom of democratic societies Research Handbook on the Student Experience in Higher Education Chi Baik,Ella R. critics **Widening University Access and Participation in the Global South** Edward Mboyonga, 2024-12-31 Using a capability approach as an analytical framework this timely volume examines how access to higher education enabled through private universities can transform students' lives and contribute to human development in low income countries in the Global South. Providing new insights into the contribution of the private higher education sector in Africa's developmental agendas, the book offers an alternative to human capital theory by offering an expansive notion on the value of higher education, emphasising both the economic and the intrinsic societal and social benefits that come from access to university and raised aspirations. The chapters identify and discuss six specific capabilities valued by students that higher education provides. This includes epistemological access, epistemic contribution, aspiration, recognition, respect and belonging, Ubuntu and employability. The book foregrounds the voices of students and lecturers to explore students' aspirations, agency, access and participation. Ultimately promoting a reconsideration of access to higher education beyond numerical terms by focusing on students' access to transformative knowledge as means to promote their freedom to achieve well-being, the book will appeal to scholars, researchers and postgraduate students in higher education, African education studies and international and comparative education more broadly. Late Hellenistic Greek Literature in Dialogue Jason König, Nicolas

While each author has his or her own specialty, the thread of shared dreams is portrayed in a call for solidarity. The separate viewpoints are drawn together to constitute a democratic platform for an enlightened critical education agenda. From narrative to critical ethnography, case studies explore the multicultural and power struggles of states, districts and schools. Intimately connected to all contributions in this collection is the commitment of each author to similarly share a common pregnancy of intention within a language of possibility.
