Development Evaluations presents concepts and procedures for evaluation in a development context. It provides procedures and examples on how to set up a monitoring and evaluation system, how to conduct participatory evaluations and do social mapping and how to construct a rigorous quasi-experimental design to answer an impact question. The text begins with the context of development evaluation and how it arrived where it is today. It then discusses current issues driving development evaluation such as the Millennium Development Goals and the move from simple project evaluations to the broader understandings of complex evaluations. The topics of implementing Results based Measurement and Evaluation and constructing a Theory of Change are emphasized throughout the text. Next, the authors take the reader down the road to results, presenting procedures for evaluating projects, programs and policies by using a Design Matrix to help map the process. This road includes determining the overall approach, formulating questions, selecting designs, developing data collection instruments, choosing a sampling strategy and planning data analysis for qualitative, quantitative and mixed method evaluations. The book also includes discussions on conducting complex evaluations, how to manage evaluations, how to present results and ethical behavior including principles, standards and guidelines. The final chapter discusses the future of development evaluation. This comprehensive text is an essential tool for those involved in development evaluation.

Evaluating School Programs James R. Sanders, 2000-05-19. This guide was written to provide teachers and administrators in primary and secondary school systems with basic programme evaluation principles and procedures to aid them in planning and evaluating school programmes. *Evaluating School Programs* provides concise yet comprehensive coverage of a complex topic in a highly usable format. It will take the reader through the five tasks of school programme evaluation: focusing the evaluation, collecting information, organizing and analyzing information, reporting information and administering the evaluation, providing examples along the way. The examples are designed to help the reader develop competence and confidence in programme evaluation. James Sanders shows how to successfully manage the many logistical, budgetary and scheduling problems encountered and provides tips on how to deal with school politics, ethical considerations and interpersonal relations as well.

[Online Assessment and Measurement](#) Mary Hricko, Scott L. Howell, 2006-01-01. Evaluation Ethics for Best Practice Michael A. Morris, 2007-09-21. Focusing on ethical challenges in program evaluation, this innovative book features six case study scenarios that end at a point where the evaluator faces a significant decision about how to proceed. For each case, two distinguished evaluators offer insights on the best course of action to choose and why. What If boxes modify the details of the scenarios, inviting readers to reflect on whether these changes alter the ethical implications of the case. Six additional cases are presented with questions that guide readers to develop their own ethical analyses. The book is organized to follow the progress of an evaluation from the entry/contracting phase through the

utilization of results
