Jihadis In Jammu And Kashmir A Portrait Gallery:

Jihadis in Jammu and Kashmir K. Santhanam, 2003 *Eurasian Security Matters* K. Santhanam, 2010-07-01 Papers presented at the International Conference on Changing Security Landscape of Eurasia Role of Regional Groupings organised by Maulana Abul Kalam Azad Institute of Asian Studies and the India Central Asia Foundation held at New Delhi during 27-29 May 2010 **Hinduism and the Ethics of Warfare in South Asia** Kaushik Roy, 2012-10-15 This book traces the evolution of theories of warfare in India from the dawn of civilization focusing on the debate between Dharmayuddha Just War and Kutayuddha Unjust War within Hindu philosophy This debate centers around four questions What is war What justifies it How should it be waged And what are its potential repercussions **Handbook of India's International Relations** David Scott, 2011-05-09 This Handbook gives an overview of India's international relations given the development of India as a major economic power in the world and the growing interest in the impact of Asia on the international system in the future Edited by David Scott of Brunel University and with chapters written by a variety of experts the Handbook of India's International Relations offers an up to date unbiased and comprehensive resource to academics students of international relations business people media professionals and the general reader There is a pre publication price on this title the price rises to 150 three months after publication *Global Criminology* K. Jaishankar, Natti Ronel, 2013-04-25 Global criminology is an emerging field covering international and transnational crimes that have not traditionally been the focus of mainstream criminology or criminal justice Global Criminology Crime and Victimization in a Globalized Era is a collection of rigorously peer reviewed papers presented at the First International Conference of the South Asian Society of Criminology and Victimology SASCV that took place in Jaipur India in 2011 Using a global yardstick as the basis for measurement the fundamental goal of the conference was to determine criminological similarities and differences in different regions Four dominant themes emerged at the conference Terrorism In a topic that operates at the intersection of international law international politics crime and victimization some questions remain unanswered Is terrorism a crime issue or a national defense issue Should terrorists be treated as war criminals soldiers or civil criminals How can international efforts and local efforts work together to defeat terrorism Cyber Crimes and Victimization Cyber space provides anonymity immediate availability and global access Cyber offenders easily abuse these open routes As cyber space develops cyber crime develops and grows To achieve better cyber security global criminologists must explore cyber crimes from a variety of perspectives including law the motivation of offenders and the impact on victims Marginality and Social Exclusion Globalization is manifest in the fast transition of people between places societies social classes and cultures Known social constructions are destroyed for new ones and marginalized people are excluded from important material social and human resources This section examines how we can provide inclusion for marginalized individuals in the global era and protect them from victimization Theoretical and Practical Models of Criminal Victimization The process of globalization as mentioned above

creates new elements of victimization But globalization can also become an opportunity for confronting and defeating victimization through improved sharing of knowledge and increased understanding of the humanity of the weak The emerging global criminology comprises diversity of attitudes explanations and perspectives The editors of this volume recognize that in the global village there is room for solid contributions to the field of criminology and criminal justice This collection is a move in this direction It is hoped that these articles will help to expand the boundaries of criminology criminal justice and victimology with a view towards reducing crime worldwide The Long Shadow Muthiah Alagappa,2008 The Long Shadow investigates the purposes and roles of nuclear weapons in the new security environment the nature and content of the national nuclear strategies of relevant states and their implications for international security and stability in the Asian security region Evaluating the Political Rationality of Terrorist Groups Eric van Um,2015-11-10 This book improves our understanding of terrorists motivations and rationality and may ultimately also indicate how to respond to the phenomenon of terrorism In his research studies Eric van Um explores the political rationality of terrorist groups The political rationality model builds on rational choice theory It demands that terrorist groups take into account the costs and benefits of their available options and choose the option promising them the highest political utility Testing the explanatory power of this model is relevant as rational choice approaches have become very prominent in terrorism research But at the same time their empirical power remains highly contested Increased knowledge of the political rationality model not only promises added value for terrorism research itself but also for social sciences more generally *Dangerous Deterrent* S. Paul Kapur,2009 **Jihad as Grand Strategy** Paul Kapur,2016-10-06 Islamist militants based in Pakistan have played a major role in terrorism around the world and pose a significant threat to regional and international security Although the Pakistan militant connection has received widespread attention only in recent years it is not a new phenomenon Pakistan has since its inception in the wake of World War II used Islamist militants to wage jihad in order to compensate for severe political and material weakness This use of militancy has become so important that it is now a central component of Pakistani grand strategy supporting jihad is one of the principal means by which the Pakistani state seeks to produce security for itself Contrary to conventional wisdom the strategy has not been wholly disastrous It has achieved important domestic and international successes enabling Pakistan to confront stronger adversaries and shape its strategic environment without the costs and risks of direct combat and to help promote internal cohesion to compensate for its weak domestic political foundations Recently however these successes of Pakistan s militant strategy have given way to serious problems The militant organizations that Pakistan nurtured over the decades are increasingly exceeding its control continued support for jihad diverts scarce resources from pressing domestic projects impeding the country s internal development and the militant campaign s repeated provocations have led India to adopt a more aggressive conventional military posture As Paul Kapur shows in *Jihad as Grand Strategy* these developments significantly undermine Pakistani interests threatening to leave it less

politically cohesive and externally secure than it was before Thus despite its past benefits the strategy has outlived its utility and Pakistan will have to abandon it in order to avoid catastrophe This will require not simply a change of policy but a thoroughgoing reconceptualization of the Pakistani state **Seminar** ,2003 Индо-пакистанский конфликт 1947-1948 годы Михаил Крысин,2022-08-15 1947 21 1947 27 1 1949 27 60 % 40 % **Business India** ,2003 **The New Terrorism** Stefan Goertz,Alexander E. Streitparth,2019-05-07 In light of asymmetrical security threats in western democracies as well as in conflict regions this timely book examines the actors strategies and tactics of Islamist terrorism and transnational organized crime around the globe The authors develop an interdisciplinary approach to understanding the ideologies forms of cooperation and technological means used in new forms of terrorism The book starts with an empirical analysis of the new Jihadism as a global Islamist theology and strategy Furthermore it investigates the interaction cooperation and fusion of transnational organized crime and Islamist terrorism and highlights new communication technologies as vital tools for terrorism Lastly the book provides an analysis of asymmetrical strategies and tactics used by terrorist organisations and of low level terrorism As such it will appeal to all political scientists and criminologists studying terrorism as well as to professionals at various national and international security services Economic and Political Weekly ,2002 The Book Review ,2003 *Rashtriya Sahara* ,2002 Deterrence and the New Global Security Environment Ian R. Kenyon,John Simpson,2013-10-18 This collection of papers rigorously examines the current place of deterrence in international security relations delivering the best of contemporary thinking This is a special issue of the leading journal Contemporary Security Policy It shows how and why nuclear deterrence was the central organizing mechanism for international security relations in the second half of the twentieth century It has been replaced by a new global security environment in which the central role of deterrence both nuclear and otherwise appears to have diminished The Cold War has been succeeded by a new state of play This book will be of interest to students of military and naval history and security studies First International Conference of the South Asian Society of Criminology and Victimology (SASCV), 15-17 January 2011, Jaipur, Rajasthan, India K. Jaishankar and Natti Ronel,2011 **Inside Nuclear South Asia** Scott Douglas Sagan,2009-08-17 This book presents an analytical account of the causes and dangerous consequences of nuclear proliferation in South Asia **Unconventional Warfare in South Asia, 1947 to the Present** Kaushik Roy,2017-03-02 Unconventional war is an umbrella term which includes insurgencies counter insurgencies terrorism and religious conflicts Insurgencies and communal conflicts have become much more common in this region since 1947 and more people have died in South Asia due to unconventional wars than conventional warfare The essays in this volume are organized in two sections While the first section deals with insurgencies counter insurgencies and terrorism the second section covers the religious aspects of the various intra state conflicts which mar the multi ethnic societies of South Asia
