Corporate Governance in Developing Economies Robert W. McGee, 2008-10-15 Much has been written about the economic and political problems of

countries that are in the process of changing from centrally planned systems to market systems. Most studies have focused on the economic, legal, political, and sociological problems these economies have had to face during the transition period. However, not much has been written about the dramatic changes that have to be made to the accounting and financial system of a transition economy. This book was written to help fill that gap. This book is the sixth in a series to examine accounting and financial system reform in transition and developing economies. The first book, *Accounting and Financial System Reform in a Transition Economy: A Case Study of Russia*, used Russia as a case study. The second volume in the series, *Accounting and Financial System Reform in Eastern Europe and Asia*, examined some additional aspects of the reform in Russia and also looked at the accounting and financial system reform efforts that are being made in Ukraine, Bosnia and Herzegovina, Armenia, Eastern Europe, and Central Asia. The third volume, *Taxation and Public Finance in Transition and Developing Economies*, examined taxation and public finance in transition and developing economies. The fourth volume, *Accounting Reform in Transition and Developing Economies*, examines accounting reform in transition and developing economies.

Corporate Liability for Insider Trading Juliette Overland, 2019-03-05 *Corporate Liability for Insider Trading* examines the reasons why there have been no successful criminal prosecutions or successful contested civil proceedings against corporations for insider trading and analyses the various rationales for prohibiting insider trading. It reviews the insider trading regulatory regime and describes its key features using both national and international examples. The book inspects a variety of criminal and civil models of corporate liability and considers the historical and theoretical basis on which corporations are subject to insider trading laws. The specific elements of the insider trading offence and the manner in which they are attributed to corporations are analysed in detail. Defences available to corporations such as Chinese Walls are explored and the obligations that are imposed on businesses as a result of insider trading regulation, security trading policies and notifications, continuous disclosure obligations and duties concerning conflicts of interest are detailed and examined. The book concludes with reform proposals intended to remedy the many legal and commercial difficulties identified in order that a new regulatory regime might be adopted to better serve regulators, businesses, investors and the broader market. This volume addresses these corporate law topics and will be of interest to researchers, academics, financial institution compliance officers, investment bankers, corporate and comparative lawyers and students and scholars in the fields of commercial law, corporate law, financial crime, company law and white collar crime.

Finance Ethics John R. Boatright, 2010-08-13 A groundbreaking exploration of the critical ethical issues in financial theory and practice. Compiled by volume editor John Boatright, *Finance Ethics* consists of contributions from scholars from many different finance disciplines. It covers key issues in financial markets, financial services, financial management and finance theory and includes chapters on market regulation, due diligence, reputational risk, insider trading, derivative contracts, hedge funds, mutual and pension funds, insurance, socially responsible investing, microfinance, earnings management, risk management, bankruptcy, executive compensation, hostile takeovers and
