A History of Medicine: Medieval medicine Plinio Prioreschi, 1996 **Elephants and Savanna Woodland** Ecosystems Christina Skarpe, Johan T. du Toit, Stein R. Moe, 2014-04-02 During the nineteenth century ivory hunting caused a substantial decrease of elephant numbers in southern Africa Soon after that populations of many other large and medium sized herbivores went into steep decline due to the rinderpest pandemic in the 1890s These two events provided an opportunity for woodland establishment in areas previously intensively utilized by elephants and other herbivores. The return of elephants to currently protected areas of their former range has greatly influenced vegetation locally and the resulting potential negative effects on biodiversity are causing concern among stakeholders managers and scientists This book focuses on the ecological effects of the increasing elephant population in northern Botswana presenting the importance of the elephants for the heterogeneity of the system and showing that elephant ecology involves much wider spatiotemporal scales than was previously thought Drawing on the results of their research the authors discuss elephant caused effects on vegetation in nutrient rich and nutrient poor savannas and the potential competition between elephants on the one hand and browsers and mixed feeders on the other Ultimately this text provides a comprehensive review of ecological processes in African savannas covering long term ecosystem changes and human wildlife conflicts It summarises new knowledge on the ecology of the sub humid African savanna ecosystems to advance the general functional understanding of savanna ecosystems across moisture and nutrient gradients Our Paper ,1907 A Richard Selzer Reader Kevin Kerrane, 2017-07-31 A Richard Selzer Reader Blood and Ink is a career spanning collection including major short stories and essays by the renowned doctor author In the 1960s while practicing as a general surgeon and teaching surgery at the Yale School of Medicine Richard Selzer began publishing unique creative work in magazines such as Harper's and Esquire By 1985 when he retired as a physician to devote himself completely to writing Selzer was already recognized as a pioneer in the field of medical humanities. When he died in 2016 as the author of 13 books his influence was acknowledged by a younger generation of doctor writers like Abraham Verghese and Atul Gawande Selzer's unusual style fuses scientific and poetic language Drawing on favorite readings from the King James Bible to the tales of Edgar Allen Poe he used this style to convey a sense of awe at the beauty and complexity of the human body even in the midst of suffering While describing himself as an atheist Selzer always searched for sacramental moments of courtesy courage and grace in medical encounters Because he often looked critically at the failure of doctors to regard the full humanity of their patients Selzer's work has become required reading in many medical training programs A Richard Selzer Reader includesseveral of the author's most famous essays and stories as well as two dozen selections that have not been collected in his previous books Chronologically the material ranges

from apprenticeship stories as far back as a high school composition to two odd self portraits that remained unpublished at the time of Selzer's death Topically the material ranges from meditations on the body and on human mortality to reflections on both medicine and writing as serious vocations Along the way Selzer celebrates the work of other doctor writers like Thomas Browne and Anton Chekhov and in a series of previously unpublished diary entries he discusses the joys of nature art and family as bulwarks against the difficulties of growing old The Book of Beasts Terence Hanbury White,1984-01-01 A preeminent medievalist presents a wonderful catalog of real and fanciful beasts including the manticore griffin phoenix amphivius jaculus and many other exotic animals White's witty erudite commentary on scientific and historical aspects enhances this survey of proto zoology on which science is based and pre scientific perceptions of the earth's creatures 128 black and white illustrations Dreams of Subversion in Medieval Jewish Art and Literature ,1997 Europe's Jewish minority culture was subjected to a barrage of public images proclaiming the dominance of the Christian majority This book is the first to explore the Jewish response to this assault in the development of a visual culture through which Jews could affirmatively construct their identity as a people It demonstrates how medieval Jews gave voice to messages of protest and dreams of subversion by actively appropriating and transforming the quintessential symbols of the dominant culture
