Institutional Elements Of Tax Design And Reform:

Institutional Elements of Tax Design and Reform John McLaren, 2003 *Institutional Elements of Tax Design and Reform* John McLaren, 2002-12-31 This is a collection of papers that study the constraints on fiscal systems imposed by problems of institutions administration and incentives in developing and post Socialist economies Chapter two focuses on the administration of indirect taxation and provides a case study of indirect taxation in Tanzania This shows how evasion can be documented and quantified through a case study that looks at a particular type of reform aimed at curbing evasion franchising or privatizing the right to tax which has been tried in several Tanzanian towns as a way of collecting vendor fees for access to a public market Chapter three is a theoretical study of evasion under a value added tax VAT and the inefficiencies it can create Chapter four studies the fiscal constraints within the federal politics of Russia while Chapters five and six examine case studies India in fiscal federalism in which the determination of fiscal outcomes is to a considerable degree a matter of bargaining between political entities in the center and in the periphery In both cases it appears that large scale distortions away from an ideal tax system emerge as a result suggesting corruption can be fought by increasing functional specialization within a tax bureaucracy The last chapter looks at the problem of opportunistic taxation particularly regarding the African context and studies various ways in which the problem can be alleviated **The Challenges of Tax**

Reform in a Global Economy James Alm, Jorge Martinez-Vazquez, Mark Rider, 2005-11-29 This book presents 15 original papers and commentaries by a distinguished group of tax policy and tax administration experts Using international examples they highlight the state of knowledge of tax reform present new thinking about the issue and analyze useful policy options The book's general goal is to examine the current and emerging challenges facing tax reformers and to assess possible directions future reforms are likely to take More specific themes include distributional issues how to tax capital income how to design specific taxes e g the income tax the value added tax the property tax how to consider the politics and administrative aspects of tax reform and how to combine the separate insights into comprehensive tax reform *Markets,*

Governance, and Institutions in the Process of Economic Development Ajit Mishra, Tridip Ray, 2018 With contributions from past and present collaborators this book celebrates the contributions of Kaushik Basu to development economics It reflects on the issues of rent control child labour labour laws harassment shared prosperity and gender empowerment in the broader context of interactions between markets governments and institutions **Historical Dictionary of the World**

Bank Sarah Tenney, Anne C. Salda, 2013-10-30 When it was founded back in 1944 no one could possibly have foreseen how the World Bank known more formally as the International Bank for Reconstruction and Development IBRD would flourish Today with 188 members it is by far the largest lender for projects in agriculture health infrastructure and many other fields in developing countries around the world with a budget of billions of dollars and a staff of more than 9 000 and its advice is usually heeded by both the developing countries which borrow from it and the advanced ones which contribute This second

edition of the Historical Dictionary of the World Bank shows the substantial progress the Bank has made this mainly through the dictionary section with concise entries on its component institutions related organizations its achievements in various fields some of the major projects and member countries and its various presidents The introduction explains how the Bank works while the chronology traces the major events over nearly 70 years Meanwhile the list of acronyms reminds us just who the main players are And the bibliography directs readers to useful internal documentation and outside studies Systems of General Sales Taxation Robert F. W. van Brederode,2009-01-01 This book gives and general overview of sales taxes and describes main characteristics of consumption taxation It also provides an economic analysis of all the taxes covered and related tax issues such as tax shifting tax incidence the economic effect of reduced rates and exemptions tax accumulation regressivity and the Laffer curve approach In addition it offers a tax policy approach in regard to specific economic sectors such as the treatment of small enterprises financial services and real property The author further focuses on contrasts between US sales tax and European VAT in regard of e commerce and the treatment of capital goods The work also offers legal analysis in areas such as cross border transactions and US constitutional restraints **Public Economics** M Govinda Rao,Mihir Rakshit,2011-01-06 Amaresh Bagchi Indian economist contributed articles **Capital and Collusion** Hilton L. Root,2016-06-28 Why does capital formation often fail to occur in developing countries Capital and Collusion explores the political incentives that either foster growth or steal nations growth prospects Hilton Root examines the frontier between risk and uncertainty analyzing the forces driving development in both developed and undeveloped regions In the former he argues institutions reduce everyday economic risks to levels low enough to make people receptive to opportunities for profit stimulating developments in technology and science Not so in developing countries There institutions that specialize in sharing risk are scarce Money hides under mattresses and in teapots creating a gap between a poor nation s savings and its investment As a consequence the developing world faces a growing disconnect between the value of its resources and the availability of finance What are the remedies for eliminating this disparity Root shows us how to close the growing wealth gap among nations by building institutions that convert uncertainty into risk Comparing China to India Latin America to East Asia and contemporary to historical cases he offers lessons that can help the World Bank and the International Monetary Fund to tackle the political incentives that are the source of poor governance in developing nations **Federal Policic and Budget Deficits: Evidence from the States of India** , *China's West Region Development: Domestic Strategies And Global Implications* Ding Lu,William A W Neilson,2004-06-29 In the last two decades China s western inland region has largely been left out of the nation s economic boom While its 355 million population accounts for 28% and its land area for 71% of China s total the region s share of the national GDP is under 20% Since 1999 Beijing has implemented the West China Development Program to boost the region s growth To study the major domestic issues and the global implications of this program the University of Victoria s Centre for Asia Pacific Initiatives organized and hosted a multidisciplinary international

flagship programme on health in India **Science, Technology and Taxation** Robert F. van Brederode, 2012-08-01 This first comprehensive study of the interaction between technology and taxation approaches the subject along four main avenues insight and analysis gained from empirical legal studies conducted in the area of taxation methods for improving the control and management of the tax function in business tax auditing through statistical sampling and changes in the fiscal environment as a result of technological capabilities Among the topics that arise are the following what choices of sampling methodology exist determination of both one sided and two sided confidence intervals under what circumstances statistical sampling is acceptable as proof of underpayment and as a basis for penalties the use of sampling agreements as a tool to improve taxpayers understanding of the process complexities encountered by the introduction of technology in tax administration in developing countries technological capability to detect economic activity in the informal sector technological innovation as substitute for inadequate human capacity improvements available to better monitor the movement and values of goods entering a country safeguards to prevent unauthorized use of personal information prioritizing resources to ensure that the key strategic objectives of the agency are being addressed government defensive action and the threat to privacy and capabilities and limitations of enterprise resource planning systems and tax engines Although the author pays especially detailed attention to the technologies developed and used by the United States Internal Revenue Service other notable systems developed by the European Union Brazil Mexico and China are also examined Various sampling methods and practices are illustrated with numerical examples As tax systems acquire ever higher levels of integration and because accuracy is crucial to the measurement of tax compliance the perspectives opened and expertly analyzed by the author will prove of great importance Practitioners tax policymakers and administrators tax standard setters and tribunals dealing with disputes over tax administration and procedure as well as academics and researchers will instantly recognize the book s great importance and practical value *Negotiating Universalism in India and Latin America* Andres Mejia-Acosta, Louise Tillin, 2021-06-15 This book explores how vertical inter governmental political and fiscal bargains and horizontal variation in political social and economic conditions across regions contribute to or undermine the provision of inclusive and sustainable social policies at the subnational level in Latin America and India The question of how to advance universal social rights while reducing territorial inequalities has been a central dilemma for Latin America and India After several decades of ambitious decentralization reforms in both regions the balance between local accountability versus centralized planning remains a theoretical and empirical problem in need of systematic exploration The chapters in this volume incorporate both federal and decentralized unitary states pointing to common political tensions across unitary and federal settings despite the typically greater institutionalization of regional autonomy in federal countries The contributors examine the territorial dimension of universalism and explore in greater and empirical detail the causal links between fiscal transfers social policies and outcomes and highlight the political dynamics that shape fiscal decentralization reforms and the

welfare state The chapters in this book were originally published as a special issue of *Regional Federal Studies*
