DRG's: the New York Experience United States. Congress. House. Select Committee on Aging. Subcommittee on Human Services,1987 **Global Perspectives on Probing Narratives in Healthcare** Casal, Teresa,Cabral, Maria de Jesus,2023-06-01 There is often a communication disconnect between medical caregivers including doctors nurses therapists and other assistive medical personnel and the patient While medical staff usually understand a patient s symptoms causes and treatments communicating this understanding to a patient using industry terminologies can lead to confusion and misunderstanding and similarly patients may lack the vocabulary to effectively communicate their experiences back to their caregivers A new approach to communication must be bridged between these groups by individuals who have experience on both sides of the conversation Previous studies of doctors who end up in the role of the patient reveal how these individuals have a dual perspective on illness combining their medical knowledge with their own personal medical experiences Narratives including autobiographical accounts and fictional stories can help bridge the gap between experiential and academic knowledge of illness by expanding one s limited perspective and accessing others points of view Autobiographical and fictional narratives can both play a role in developing a more comprehensive understanding of illness beyond simply treating the disease It is necessary to further examine the ethical and methodological underpinnings of narrative based interventions in the education of healthcare professionals practitioners and patients Global Perspectives on Probing Narratives in Healthcare offers a multidisciplinary examination of theoretical and methodological uses of narratives in healthcare by bringing together medical aspects of healthcare and the study of arts and humanities This illustrates specific applications of narratives in healthcare settings including improvement of clinical skills performance of the caring role and self efficacy for building a true partnership in the patient s health journey through varied approaches up to date tools and resources that can be transferred and adapted to specific educational and healthcare contexts This diverse collection of expert knowledge and experience is led by editors with over 20 years of teaching experience Dr Teresa Casal of the University of Lisbon Portugal and Dr Maria de Jesus Cabral of the University of Minho Portugal Expertise featured in this book includes contributions from some of the most prestigious academic institutions including Columbia University in the United States King s College in the United Kingdom University of Padua in Italy and more It is an essential resource for healthcare and social science researchers academics advanced healthcare students health training and education departments healthcare practitioners and patients associations and policymakers in healthcare who are looking to broaden

their scope of understanding of the patient experience Social Exclusion in the UK Mel Hughes, 2025-02-28 In UK society there are cultural norms and assumptions that affect many marginalised groups and this book aims to address and challenge these through the lens of the people who have lived these experiences Social Exclusion in the UK presents a range of lived experiences alongside a critical commentary on the impact of social stigma exclusion and marginalisation on people's lives This book's chapters are co-authored by people with lived experience and academics and are all underpinned by the Transformative Learning Theory developed by scholar Mezirow The marginalised experiences discussed in this book include different types of substance users care leavers asylum seekers offenders HIV positive those living in poverty or those who identify as transgender What makes this book unique is that it gives a voice to those who have been the most affected by inequality whether it's economic or social and health inequalities Those affected are the least likely to be involved in shaping and informing responses to it and this lack of involvement risks the further exclusion of those who are already marginalised A few of the ways this book aims to challenge this include legitimising and prioritising lived experience expertise fostering critical reflection of our own beliefs and assumptions and drawing on lived experience expertise to inform responses and solutions Lived Institutions as History of Experience Johanna Annola, Hanna Lindberg, Pirjo Markkola, 2023-12-26 This

open access book focuses on institutions that were produced and formed by the emerging welfare state How were institutions experienced by the people who interacted with them How did institutions as sites of experience shape and structure people's everyday lives Histories of institutions have mainly focused on the structures and power relations produced by institutional settings Likewise despite an extensive historiography of the welfare state reflections on individuals' experiences of welfare are few By using lived institutions as its conceptual frame this edited collection merges the fields of institutional studies the history of the welfare state and the novel and vibrant field of the history of experience
