Born to Walk Dan Rubinstein, 2015-04-01 The case for getting back on our feet The humble act of putting one foot in front of the other transcends age geography culture and class and is one of the most economical and environmentally responsible modes of transit Yet with our modern fixation on speed this healthy pedestrian activity has been largely left behind At a personal and professional crossroads writer editor and obsessive walker Dan Rubinstein travelled throughout the U S U K and Canada to walk with people who saw the act not only as a form of transportation and recreation but also as a path to a better world There are no magic bullet solutions to modern epidemics like obesity anxiety alienation and climate change But what if there is a simple way to take a step in the right direction Combining fascinating reportage eye opening research and Rubinstein's own discoveries **Born to Walk** explores how far this ancient habit can take us how much repair is within range and guarantees that you'll never again take walking for granted **Walking Through Social Research** Charlotte

Bates, Alex Rhys-Taylor, 2017-04-11 As an ethnographic method walking has a long history but it has only recently begun to attract focused attention By walking alongside participants researchers have been able to observe experience and make sense of a broad range of everyday practices At the same time the idea of talking and walking with participants has enabled research to be informed by the landscapes in which it takes place By sharing conversations in place and at the participants pace sociologists are beginning to develop both a feel for and a theoretical understanding of the transient embodied and multisensual aspects of walking The result as this collection demonstrates is an understanding of the social world evermore congruent with people's lived experiences of it This interdisciplinary collection comprises a unique journey through a variety of walking methodologies The collection highlights a range of possibilities for enfolding sound smell emotion movement and

memory into our accounts illustrating the sensuousness skill pitfalls and rewards of walking as a research practice Each chapter draws on original empirical research to present ways of walking and to discuss the conceptual practical and technical issues that walking entails Alongside feet on the ground the devices and technologies that make up hybrid research mobilities are brought to attention The collection is bookended by two short pedestrian essays that take the reader on illustrative urban walks suggesting routes through the city as well as ways in which the reader might make their own path through walking methods An innovative title *Walking Through Social Research* will be of interest to undergraduate and postgraduate students researchers and academics who are interested in Sociology Geography Cultural Studies Urban Studies and Qualitative Research Methods

Explorers Collectif, 2016-09-08 T00:00:00+02:00 This publication brings together an outstanding ensemble of works by artist explorers selected from France's national collections Whatever the terrain on land or at the depths of the ocean real virtual or even at the farthest limits of the subconscious exploration remains a quest accomplished thanks to and in spite of oneself to redefine the contours of a world whether it exists for real or in our imagination In this respect exploration is not so unlike art which is largely inspired by it both in terms of how it is done and its objective From *Voyage autour de ma chambre* by Xavier de Maistre whose detailed inventory encompasses just a single room to Jules Vernes *Voyages extraordinaires* in which we anticipate an exploration of the seas the centre of the Earth and outer space the paths taken by the explorer seem infinite from the most exotic to the most local from the direct trajectory to the most labyrinthine of routes In this book the artist assumes the role of explorer inventor and cartographer in turn plunges into the seas traverses the oceans digs beneath the earth loses their way finds it again or becomes a castaway taking the reader along with them on the ride This digital book is a revised and enhanced edition of the two catalogues created to present the *Explorateurs* exhibition shown at the Centre des Arts in Enghien les Bains in 2010 then at the Musée de l'Abbaye Sainte Croix des Sables d'Olonne in 2012 Sébastien Faucon Centre national des arts plastiques

Elemental Sensuous John Murungi, 2016-09-23 Under the guidance of phenomenological insights this book presents the sensuous in its elemental sense The elemental is not to be confused here with the classical notion of the atom which is viewed as a self contained entity into which all reality is reducible Rather the elemental is a living creative force that resists categorization This force embodies the principle of openness and opening a principle celebrated and given expression by numerous artists and other friends of the sensuous As elemental the sensuous irreducibly expresses itself in multiple ways The editors of this volume avoid posting themselves between the sensuous and those to whom it presents itself Each of the contributors here responds to the call of the elemental and each finds his or her starting point where everyone else starts and ends The multiple voices brought together here constitute a concert with the elemental sensuous as the conductor In reading this book the reader will become more aware of himself or herself and more aware of the world in which he or she lives

The Routledge International Handbook of Walking C. Michael Hall, Yael Ram, Noam Shoval, 2017-07-28 Walking is an essentially human activity From a basic means of transport and opportunity for leisure through to being a religious act walking has served as a significant philosophical literary and historical subject Thoreau's 1851 lecture on Walking or the Romantic walks of the Wordsworths at Grasmere in the early 19th Century for example helped create a philosophical foundation for the importance of the act of walking as an act of engagement with nature Similarly and sometimes inseparable from secular appreciation pilgrimage trails provide opportunities for finding self and others in the travails of the walk More recently walking has been embraced as a means of encouraging greater health and well being community improvement and more sustainable means of travel Yet despite the significance of the subject of walking there is as yet no integrated treatment of the subject in the social science literature This handbook therefore brings together a number of the main themes on the study of walking from different disciplines and literatures into a single volume

that can be accessed from across the social sciences It is divided into five main sections culture society and historical context social practices perceptions and behaviours hiking trails and pilgrimage routes health well being and psychology and method planning and design Each of these highlights current approaches and major themes in research on walking in a range of different environments This handbook carves out a unique niche in the study of walking The international and cross disciplinary nature of the contributions of the book are expected to be of interest to numerous academic fields in the social and health sciences as well as to urban and regional planners and those in charge of the management of outdoor recreation and tourism globally
