In addition, an entire chapter is dedicated to sleep disorders in children. Drawing on the long-time experience of five board-certified sleep physicians with different professional backgrounds, the book reflects the interdisciplinary nature of sleep medicine. It includes the current international classification systems as well as scoring rules and clinical guidelines. It is intended for physicians and therapists from various specialties including internal medicine (e.g., pulmonology and cardiology), psychology, psychiatry, neurology, paediatrics, otorhinolaryngology, and general medicine who are interested in sleep medicine. It also serves as a textbook in these specialties. To optimize its clinical value, a uniform structure is used for the various chapters, including practical tips, comprehension questions, and clinical case presentations.
