Freedom Planning In Australia:

Freedom & Planning in Australia Arthur Campbell Garnett, 1949 Larrikins, Rebels and Journalistic Freedom in Australia Josie Vine, 2021-03-01

Larrikins Rebels and Journalistic Freedom is a cultural history of Australian journalism In a democratic nation where a free news media is not guaranteed Australian journalism has inherited what could be described as a Larrikin tradition to protect its independence This book mines Australian journalism s rebelliousness humor and distinct disrespect for authority in various socio historical contexts to explore its determination to maintain professional independence Beginning with a Larrikin analysis of Australian journalism s inherited Enlightenment tradition Dr Josie Vine takes the reader through the Colonial era s hardships Federation two World Wars the Cold War s fear and suspicion the swinging sixties a Prime Minister s dismissal 1980 s neo liberalism post 9 11 and finally provides a conclusive synthesis of current Australian journalism culture Throughout the book highlights the audacious iconoclastic and determined figure of the Larrikin journalist forever pushing boundaries to protect democracy s cornerstone freedom of the news media Book length histories of Australian journalism are still relatively rare but what makes this new arrival particularly welcome is the way in which it is structured around an exploration of the Larrikin paradox This refers to the fact that although Australian journalism may profess to be professional and reputable it can also be raucous unruly and disrespectful in pursuit of what it sees as its democratic purposes The Larrikin may be a uniquely Australian figure but the paradox is far from confined to Australian journalism not least because of the influence of erstwhile Australian Rupert Murdoch on journalism in the Anglosphere and this book should be of considerable interest to those concerned with the means whereby journalism performs its democratic Fourth Estate role in modern democracies This is an extremely very well informed and highly insightful work which ought to appeal equally to those interested in journalism and in Australian politics Julian Petley Professor Brunel University London UK

in Hong Kong Anne Cheung, 2021-11-01 Ever since it was first known that Hong Kong would become China's Special Administrative Region there has been growing concern over the protection of the freedom of the press in this oriental city. The anxiety is however not confined to the fear that the new sovereign might rule Hong Kong under an iron fist. Rather many believe that the locals are apparently surrendering their freedom by practicing self censorship, a mechanism of anticipatory avoidance of sanctions. This book asks what does self censorship mean to Hong Kong at the time of political and historical juncture. It argues that self censorship is a strategic game of coordination when both the ruler and the subjects are making use of the fluid boundaries in local and international politics. Rich in anecdotes, historical details and legal analysis, this book depicts the game of *Chui* shadow boxing where promises, threats and bluffs are exchanged. Winning for either side calls for the skilful manipulation of voice and silence at all levels. *APAIS 1992: Australian public affairs information service*,

Midwifery, Freedom to Practise? Lindsay Reid, 2007 This book deals with the central theme of freedom to practise midwifery in selected countries of the world. Each chapter has a separate author who has specific knowledge of the country for that chapter, either as a citizen or researcher. The underpinning theme of this book is the philosophy of best midwifery practice, particularly that which is evidence based. To clarify the meaning of the term, the book includes an initial chapter that discusses the aims and realities of achieving best practice wherever in the world a midwife may be and under whatever circumstances she may be working. **Network Centric Warfare and Coalition Operations** Paul T. Mitchell, 2009-02-05

This book argues that Network Centric Warfare (NCW) influences how developed militaries operate in the same fashion that an operating system influences the development of computer software. It examines three inter-related issues: the overwhelming military power of the United States; the growing influence of NCW on military thinking; and the centrality of coalition operations in modern military endeavours. Irrespective of terrorist threats and local insurgencies, the present international structure is remarkably stable: none of the major powers seeks to alter the system from its present liberal character, as demonstrated by the lack of a military response to US military primacy. This primacy privileges the American military doctrine and thus the importance of NCW, which promises a future of rapid, precise and highly efficient operations, but also a future predicated on the digitization of the battle space. Participation in future American-led military endeavours will require coalition partners to be networked; interoperability will therefore be a key consideration of a partner's strategic worth. Network Centric Warfare and Coalition Operations will be of great interest to students of strategic studies, international security, US foreign policy and international relations in general. *APAIS 1999: Australian public affairs information service*, *Super Freedom* Trish Power, 2011-09-20 *Super Freedom* is just that: a guide for women to super. This guide has a strong aspirational focus on what superannuation can provide for women regardless of their marital circumstances, age or even their current superannuation balances. For women it's not so much about the actual amount of super they have but what they can do with it, e.g. travel, shop, live. Throwing aside the shackles of jargon and terminology, Trish

Power's guide to superannuation for women provides with women with everything they need to know about how much super they need getting their super set up how to increase their super balance how to move into retirement insurance and estate planning
