For a Philosophy of Freedom and Strife Günter Figal, 1998-01-01 This first book length work of the prominent German philosopher Gunter Figal to appear in English offers a radical defense of metaphysical philosophy in the era of postmodern thought For Figal metaphysics does not represent an anachronistic and pernicious mode of thought that ought to be overcome but rather is a type of thinking that proceeds from a recognition of the necessary coherence of everything with its opposite It is this agonistic relationship of opposites that Figal following Heraclitus terms strife Rather than regarding the conflict of opposites

as necessarily resulting in the dissolution of meaning and sense as many contemporary thinkers maintain Figal contends that sense and meaning can only come into existence metaphysically that is to say as a consequence of strife And the context within which strife occurs is freedom Using these concepts of strife and freedom Figal proposes new and provocative readings of Plato Hegel Nietzsche and Kierkegaard as well as of some of the most controversial figures of twentieth century philosophy

Relentless Love Edwin Carl Smith, 2004 Ed Smith defines enchantment as

that place where our life and our deepest dreams merge and he maintains that it is our true nature In Relentless Love he proposes that we can live lives of enchantment through the practice of relentless love He inspires us to create a world based on our intention to love and our faith in life and contends that evolution is propelling us to do so He defines evolution as events you do not like that converge to create a possibility you could not anticipate This is an original lucid voice with something very compelling and vital to say that can change all of our lives Called for Freedom Jose Comblin,2009-07-01

The Art of Freedom Juliane Rebentisch,2018-03-15

The concept of democratic freedom refers to more than the kind of freedom embodied by political institutions and procedures. Democratic freedom can only be properly understood if it is grasped as the expression of a culture of freedom that encompasses an entire form of life. Juliane Rebenitsch's systematic and historical approach demonstrates that we can learn a great deal about the democratic culture of freedom from its philosophical critics. From Plato to Carl Schmitt the critique of democratic culture has always been articulated as a critique of its aestheticization. Rebenitsch defends various phenomena of aestheticization from the irony typical of democratic citizens to the theatricality of the political as constitutive elements of democratic culture and the notion of freedom at the heart of its ethical and political self-conception. This work will be of particular interest to students of Political Theory, Philosophy and Aesthetics. *Freedom and Environment* Michael Hannis, 2015-10-05. Must freedom be sacrificed to achieve ecological sustainability or vice versa? Can we be genuinely free and live in sustainable societies? This book argues that we can if we recognise and celebrate our ecological embeddedness rather than seeking to transcend it. But this does not mean freedom can simply be redefined to fit within ecological limits. Addressing current unsustainability will involve significant restrictions and hence will require political justification, not just scientific evidence. Drawing on material from perfectionist liberalism, capabilities approaches, human rights, relational ethics and virtue theory, Michael Hannis explores the relationship between freedom and sustainability, considering how each contributes to human flourishing. He argues that a substantive and ecologically literate conception of human flourishing can underpin both capability-based environmental rights and a eudaimonist ecological virtue ethics. With such a foundation in place, public authorities can act both to facilitate ecological virtue and to remove structural incentives to ecological vice. *Freedom and Environment* is a lucid addition to existing literature in environmental politics and virtue ethics and will be an excellent resource to those studying debates about freedom with debates about ecological sustainability. Melancholia of Freedom Thomas Blom Hansen, 2012. The end of apartheid in 1994 signaled a moment of freedom and a promise of a nonracial future. With this promise came an injunction: define yourself as you truly are as an individual and as a community. Almost two decades later, it is clear that it was less the prospect of that future than the habits and horizons of anxious life in racially defined enclaves that determined postapartheid freedom. In this book, Thomas Blom Hansen offers an in-depth analysis of the uncertainties, dreams and anxieties that have accompanied postapartheid freedoms in Chatsworth, a formerly Indian township in Durban. Exploring five decades of township life, Hansen tells the stories of ordinary Indians whose lives were racialized and framed by the township and how these residents domesticated and inhabited this urban space and its institutions during apartheid and after. Hansen demonstrates the complex and ambivalent nature of ordinary township life. While the ideology of apartheid was widely rejected, its practical institutions, from urban planning to houses, schools and religious spaces, were embraced in order to remake the community. Hansen describes how the racial segmentation of South African society still informs daily life, notions of race, personhood, morality and religious ethics. He also demonstrates the force

of global religious imaginings that promise a universal and inclusive community amid uncertain lives and futures in the postapartheid nation state

Freedom All The Way Up Christian J. Barrigar, 2017-05-19 Freedom All The Way Up proposes four intertwined elements that make up the meaning of life self worth purpose identity and hope Materialism atheism claim the universe has no meaning so there is no larger purposeful story into which we can place ourselves we are left on our own to construct meaning for our lives Barrigar argues though that the universe possess God s meaning and purpose to provide the space and conditions by which to bring about the existence of agape capable beings in agape loving relationships with God and with others In effect the universe is a great freedom system designed by God with freedom built in all the way up from the Big Bang to the emergence of big brains and free will Barrigar describes the emergence of this system through his novel agape probability account of God s design for the universe which integrates such disciplines as quantum physics statistical mechanics probability theory evolutionary psychology neuroscience and game theory This system sets up the conditions for a fundamental choice between autonomous freedom which focuses principally on self and agapic freedom which focuses principally on God and on others Materialism chooses autonomous freedom but thereby introduces nihilism into each of the elements of meaning In turns out that nihilism is a much greater problem for Materialism than suffering is for Theism In contrast agapic freedom infuses self worth purpose identity and hope with God s agape love dispelling Materialism s inherent nihilism Freedom All The Way Up provides a dramatic new proposal for God and the meaning of life in our scientific and humanist age
