Freie Universitaet Berlin:

Die Freie Universität Berlin (1967-1973) / The Free University Berlin (1967 - 1973) Karl Kiem, 2008-06-25 Das Gebäude der Freien Universität Berlin Candilis Josic Woods Schiedhelm 1963-73 ist ein bahnbrechendes Werk in der Tradition der heroischen Moderne. Dieses wird in der vorliegenden Untersuchung anhand einer Fülle bisher unpublizierten Quellenmaterials zum ersten Mal umfassend untersucht. So werden nicht nur die bei diesem Gebäude umgesetzten technischen Innovationen, sein utopischer Charakter und sein Einfluss auf die internationale Entwicklung im Hochschulbau der sechziger Jahre des zwanzigsten Jahrhunderts untersucht, sondern auch die personellen, politischen und mentalen Ursachen für die Vielzahl der technischen Probleme, die die Ausführung des Gebäudes kompromittierten und schließlich einen dunklen Schatten auf seine Reputation legten. Das in jüngster Zeit wiedererwachte Interesse an der FU Berlin und den Architekten Candilis Josic Woods und Schiedhelm zeigt wie die Relevanz dieses Gebäudes mit seiner kompakten Synthese von komplexer Konzeption und tektonischer Innovation in Verbindung mit differenzierten baugeschichtlichen Bezügen jenseits von nostalgischen Formen für Architekten, Lehrende, Studenten und Theoretiker fort dauert. *Empires of Ideas* William C. Kirby, 2025-05 A Marginal Revolution Best Non-fiction Book A fascinating book Steven Mintz Inside Higher Ed Substantive on virtually every page the author actually understands how universities work An impressive performance Tyler Cowen Marginal Revolution With his extraordinary breadth of curiosity and equal ease in the histories and cultures of these countries only Bill Kirby could have written this book It is must reading for everyone who cares about universities a thought provoking lesson in the strange mix of durability and vulnerability that defines this key modern institution Richard Broadhead President Emeritus Duke University William Kirby's new book is unique I know of nothing else on higher education that resembles it in breadth, scope and sheer comparative information and analysis Anyone interested in the nature of universities during the past two centuries will want to read this volume Neil L Rudenstine President Emeritus Harvard University Today American institutions dominate nearly every major ranking of global universities Yet in historical terms America's preeminence is relatively new and there is no reason to assume that US schools will continue to lead the world a century from now Indeed America's supremacy in higher education is under great stress particularly at its public universities while Chinese universities are on the ascent Will China threaten American primacy *Empires of Ideas* looks to the past two hundred years for answers examining the successes of leading universities to determine how they rose to prominence and what threats they currently face William C Kirby gives special attention to the challenges that Chinese academic leaders must confront reinvesting in undergraduate teaching developing new models of funding and navigating a political system that may undermine a true commitment to free inquiry and academic excellence Current Catalog National Library of Medicine (U.S.), 1983 First multi-year cumulation covers six years 1965-70 **Reflections on the Commemoration of the First World War** David Monger, Sarah Murray, 2020-11-30 The First World War's centenary generated a mass of commemorative activity worldwide

Officially and unofficially individually collectively and commercially locally nationally and internationally efforts were made to respond to the legacies of this vast conflict This book explores some of these responses from areas previously tied to the British Empire including Australia Britain Canada India and New Zealand Showcasing insights from historians of commemoration and heritage professionals it provides revealing insider and outsider perspectives of the centenary How far did commemoration become celebration and how merited were such responses To what extent did the centenary serve wider social and political functions Was it a time for new knowledge and understanding of the events of a century ago for recovery of lost or marginalised voices or for confirming existing clichés And what can be learned from the experience of this centenary that might inform the approach to future commemorative activities The contributors to this book grapple with these questions coming to different answers and demonstrating the connections and disconnections between those involved in building public knowledge of the war to end all wars

Ragip Zik, 2019-09-24 Many claim that political deliberation has become exceedingly affective and hence destabilizing The authors of this book revisit that assumption While recognizing that significant changes are occurring these authors also point out the limitations of turning to contemporary democratic theory to understand and unpack these shifts They propose instead to reframe this debate by deploying the analytic framework of affective societies which highlights how affect and emotion are present in all aspects of the social What changes over time and place are the modes and calibrations of affective and emotional registers With this line of thinking the authors are able to gesture towards a new outline of the political

covered several aspects of functional integration from a robust mathematical foundation to many applications heuristic and
rigorous in mathematics physics and chemistry It included analytic and numerical computational techniques One of the goals
was to encourage cross fertilization between these various aspects and disciplines The first week was focused on quantum
and classical systems with a finite number of degrees of freedom the second week on field theories During the first week the
basic course given by P Cartier was a presentation of a recent rigorous approach to functional integration which does not
resort to discretization nor to analytic continuation It provides a definition of functional integrals simpler and more powerful
than the original ones Could this approach accommodate the works presented by the other lecturers Although much remains
to be done before answering Yes there seems to be no major obstacle along the road The other courses taught during the
first week presented a solid introduction to functional numerical techniques A Sokal and their applications to functional
integrals encountered in chemistry N Makri b integrals based on Poisson processes and their applications to wave
propagation S K Foong in particular a wave restorer or wave designer algorithm yielding the initial wave profile when one
can only observe its distortion through a dissipative medium c the formulation of a quantum equivalence principle H Kleinert
