**The Decline of Infant and Child Mortality** Carlo A. Corsini, Pier Paolo Viazzo, 2023-12-11 Of the many changes that have taken place in Western society during the past two centuries few have been more significant than the steep fall in infant and child mortality However the timing and causes of the decline are still poorly understood While some scholars attribute it to general improvements in living standards others emphasize the role of social intervention and public health reforms Written by specialists from several disciplinary fields the twelve essays in this book break entirely new ground by providing a long term perspective that challenges some deep rooted ideas about the European experience of mortality decline and may help explain the forces and causal relationships behind the still tragic incidence of preventable infant and child deaths in many parts of the world today This book will become a standard work for students and researchers in demography social and economic history population geography and the history of medicine and it will be of interest to anyone concerned with current debates on the policies to be adopted to curb infant and child mortality in both developed and developing countries

*The Riviera, Exposed* Stephen L. Harp, 2022-05-15 A sweeping social and environmental history *The Riviera Exposed* illuminates the profound changes to the physical space that we know as the quintessential European tourist destination Stephen L Harp uncovers the behind the scenes impact of tourism following World War II both on the environment and on the people living and working on the Riviera particularly North African laborers who not only did much of the literal rebuilding of the Riviera but also suffered in that process Outside of Paris the Riviera has been the most visited region in France depending almost exclusively on tourism as its economic lifeline Until recently we knew a great deal about the tourists but much less about the social and environmental impacts of their activities or about the life stories of the North African workers upon whom the Riviera s prosperity rests The technologies embedded in roads airports hotels water lines sewers beaches and marinas all required human intervention and travelers were encouraged to disregard this intervention Harp s sharp analysis explores the impacts of massive construction and public works projects revealing the invisible infrastructure of tourism its environmental effects and the immigrants who built the Riviera *The Riviera Exposed* unearths a gritty history one of human labor and ecological degradation that forms the true foundation of the glamorous Riviera of tourist mythology
