Transactions of the Royal Historical Society: Volume 9 Royal Historical Society,1999-12-09 Volume 9 of the RHS Transactions contains essays based around the theme oral history memory and written tradition Spain at War James Matthews,2019-04-18 Spain s principal and most devastating war during the 20th century was unusually for most of Europe an internal conflict During the Spanish Civil War of 1936 to 1939 two competing armies the insurgent and counterrevolutionary Nationalist Army and the Republican Popular Army engaged in a conflict to impose their version of Spanish identity and the right to shape the country s future In its aftermath Francoist Spain remained on a war footing for the duration of the Second World War In spite of the unabated flood of books on the Spanish Civil War and its consequences historians of Spain in the 20th century have focused relatively little on the interaction of society and culture and their roles in wartime mobilization Spain at War addresses this omission through an examination of individual experiences of conflict and the mobilization of society This edited volume acknowledges the agency of low ranking individuals and the impact of their choices upon the historical processes that shaped the conflict and its aftermath In doing so this new military history provides a more complex and nuanced understanding of Spain s most intense period of wartime cultural mobilization between the years 1936 to 1944 and challenges traditional political accounts of the period **A Box of Sand** Charles

Stephenson,2014-12-19 This is the first book in the English language to offer an analysis of a conflict that in so many ways raised the curtain on the Great War In September 1911 Italy declared war on the once mighty transcontinental Ottoman Empire but it was an Empire in decline The ambitious Italy decided to add to her growing African empire by attacking Ottoman ruled Tripolitania Libya The Italian action began the rapid fall of the Ottoman Empire which would end with its disintegration at the end of the First World War The day after Ottoman Turkey made peace with Italy in October 1912 the Balkan League attacked in the First Balkan War The Italo Ottoman War as a prelude to the unprecedented hostilities that would follow has so many firsts and pointers to the awful future the first three dimensional war with aerial reconnaissance and bombing and the first use of armored vehicles operating in concert with conventional ground and naval forces war fever whipped up by the Italian press military incompetence and stalemate lessons in how not to fight a guerrilla war mass death from disease and 10 000 more from reprisals and executions Thirty thousand men would die in a struggle for what may be described as little more than a scatolone di sabbia a box of sand As acclaimed historian Charles Stephenson portrays in this ground breaking study if there is an exemplar of the futility of war this is it Apart from the loss of life and the huge cost to Italy much higher than was originally envisaged the main outcome was to halve the Libyan population through emigration

famine and casualties The Italo Ottoman War was a conflict overshadowed by the Great War but one which in many ways presaged the horrors to come A Box of Sand will be of great interest to students of military history and those with an interest in the history of North Africa and the development of technology in war *Shots in the Dark* Jadwiga Biskupska, Sara B. Castro, 2025-09-02 Brings together geographies and methodologies often kept apart by the difficulties of researching such a broad ranging topic as the war Shots in the Dark offers cutting edge scholarship across different subfields in World War II history revealing new insights into how this crucial conflict was planned experienced and fought Twelve chapters demonstrate the broad scope of wartime innovation and how the war functioned as a global turning point driving change at all levels of human society from government institutions to individual identities Contributors collaborated in a vibrant workshops series sponsored by the North American branch of the Second World War Research Group SWWRGNA an organization that emerged to nurture scholarship on the global war and unite scholars fragmented in narrower regional and methodological stovepipes to consider the war as a whole The SWWRGNA and this volume showcase the work of diverse historians across subfields operational cultural gender social intelligence and diplomatic history This approach exposes the Second World War as a catalyst for overlapping global changes that revolutionized the world after 1945 These scholars reveal continuities and parallels in wartime experiences that would remain invisible in narrowly focused projects The volume establishes three frameworks for understanding and interpreting changes the war provoked 1 institutional adaptation 2 totalization or the militarization of civilians and 3 cultural transformation Each of the three frameworks is explored from four vantage points Geographies are deliberately contrasted within each framework to examine the broad scope of that level of war driven change *Women and Work in Eighteenth-Century France* Daryl M. Hafter, Nina Kushner, 2015-01-12 In the eighteenth century French women were active in a wide range of employments from printmaking to running whole sale businesses although social and legal structures frequently limited their capacity to work independently The contributors to Women and Work in Eighteenth Century France reveal how women at all levels of society negotiated these structures with determination and ingenuity in order to provide for themselves and their families Recent historiography on women and work in eighteenth century France has focused on the model of the family economy in which women s work existed as part of the communal effort to keep the family afloat usually in support of the patriarch s occupation The ten essays in this volume offer case studies that complicate the conventional model wives of ship captains managed family businesses in their husbands extended absences high end prostitutes managed their own households female weavers tailors and merchants increasingly appeared on eighteenth century tax rolls and guild membership lists and female members of the nobility possessed and wielded the same legal power as their male counterparts Examining female workers within and outside of the context of family Women and Work in Eighteenth Century France challenges current scholarly assumptions about gender and labor This stimulating and important collection of essays broadens our understanding of the diversity vitality and crucial importance of

women's work in the eighteenth century economy Montesquieu's Science of Politics David W. Carrithers, Michael A. Mosher, Paul A. Rahe, 2000-12-20 Montesquieu's *The Spirit of Laws* is one of a handful of classic works of political philosophy deserving a fresh reading every generation. The product of immense erudition, Montesquieu's treatise has captured since its first printing in 1748 the imagination of an impressive array of intellectuals including Rousseau, Voltaire, Beccaria, Madison, Hamilton, Jefferson, Herder, Sieyès, Condorcet, Robespierre, Bentham, Burke, Constant, Hegel, Tocqueville, Emile Durkheim, Raymond Aron, and Hannah Arendt. In what constitutes the only English language collection of essays ever dedicated to the analysis of Montesquieu's contributions to political science, the contributors review some of the most vexing controversies that have arisen in the interpretation of Montesquieu's thought. By paying careful attention to the historical, political, and philosophical contexts of Montesquieu's ideas, the contributors provide fresh readings of *The Spirit of Laws*, clarify the goals and ambitions of its author, and point out the pertinence of his thinking to the problems of our world today. **New Perspectives on European Women's Legal History** Sara L. Kimble, Marion Röwekamp, 2016-07-01 This book integrates women's history and legal studies within the broader context of modern European history in the late nineteenth and twentieth centuries. Sixteen contributions from fourteen countries explore the ways in which the law contributes to the social construction of gender. They analyze questions of family law and international law and highlight the politics of gender in the legal professions in a variety of historical, social, and national settings including Eastern, Southern, Western, Northern, and Central Europe. Focusing on different legal cultures, they show us the similarities and differences in the ways the law has shaped the contours of women and men's lives in powerful ways. They also show how women have used legal knowledge to struggle for their equal rights on the national and transnational level. The chapters address the interconnectedness of the history of feminism, legislative reforms, and women's citizenship and build a foundation for a comparative vision of women's legal history in modern Europe. *Bulletin of the Institute of Historical Research* University of London. Institute of Historical Research, 1928. Contains reports on archives and on the problems and methods of historical research; summaries of unpublished historical theses produced at the institute; addenda and corrigenda to the Dictionary of National Biography, the New English Dictionary, and other standard collections; the migrations of historical manuscripts, etc. etc. *Loos 1915* Nick Lloyd, 2008-10-01 In little over three weeks of intensive fighting, which not only witnessed the first British use of poison gas but also the debut of New Army divisions filled with citizen volunteers, British forces at Loos managed to drive up to two miles into the German positions. However, they were unable to capitalise on their initial gains. After suffering nearly 60,000 casualties—three times the number suffered by their opponents—and being driven from the German lines in disorder, bitter recrimination followed. Nick Lloyd presents a reassessment of the Battle of Loos, arguing that it was vital to the development of new strategies and tactics. He places it within its political and strategic context, as well as discusses command and control and the tactical realities of war on the Western Front during 1915. *A New Approach to Global Studies from the*

Defining Culinary Authority Jennifer J. Davis, 2013-01-02 In the eighteenth and nineteenth centuries French cooks began to claim central roles in defining and enforcing taste as well as in educating their diners to changing standards Tracing the transformation of culinary trades in France during the Revolutionary era Jennifer J Davis argues that the work of cultivating sensibility in food was not simply an elite matter it was essential to the livelihood of thousands of men and women Combining rigorous archival research with social history and cultural studies Davis analyzes the development of cooking aesthetics and practices by examining the propagation of taste the training of cooks and the policing of the culinary marketplace in the name of safety and good taste French cooks formed their profession through a series of debates intimately connected to broader Enlightenment controversies over education cuisine law science and service Though cooks assumed prominence within the culinary public sphere the unique literary genre of gastronomy replaced the Old Regime guild police in the wake of the French Revolution as individual diners began to rethink cooks authority The question of who wielded culinary influence and thus shaped standards of taste continued to reverberate throughout society into the early nineteenth century This remarkable study illustrates how culinary discourse affected French national identity within the country and around the globe where elite cuisine bears the imprint of the country's techniques and labor organization

Internationalism in the Labour Movement 1830-1940 Holthoon, Marcel van der Linden, 2025-02-10

Journal of the Society for Army Historical Research Society for Army Historical Research (London, England), 1929

Seducing the French Richard F. Kuisel, 1993 When Coca Cola was introduced in France in the late 1940s the country's most prestigious newspaper warned that Coke threatened France's cultural landscape This is one of the examples cited in Richard Kuisel's engaging exploration of France's response to American influence after World War II In analyzing early French resistance and then the gradual adaptation to all things American that evolved by the mid 1980s he offers an intriguing study of national identity and the protection of cultural boundaries The French have historically struggled

against Americanization in order to safeguard Frenchness What would happen to the French way of life if gaining American prosperity brought vulgar materialism and social conformity A clash between American consumerism and French civilisation seemed inevitable Cold War anti Communism the Marshall Plan the Coca Cola controversy and de Gaulle's efforts to curb American investment illustrate ways that anti Americanization was played out Kuisel also raises issues that extend beyond France including the economic social and cultural effects of the Americanized consumer society that have become a global phenomenon Kuisel's lively account reaches across French society to include politicians businessmen trade unionists Parisian intelligentsia and ordinary citizens The result reveals much about the French and about Americans As Euro Disney welcomes travellers to its Parisian fantasyland and with French recently declared the official language of France to defend it from the encroachments of English Kuisel's book is especially relevant

The Soldier's Reward Jennifer Ngaiire Heuer, 2024-12-03

A sweeping history of intimacy and family life in France during the age of revolution The French Revolution and Napoleonic Wars devastated Europe for nearly a quarter of a century The Soldier's Reward recovers the stories of soldiers and their relationships to family and domestic life during this period revealing how prolonged warfare transformed family and gender dynamics and gave rise to new kinds of citizenship In this groundbreaking work combining social cultural gender and military history Jennifer Ngaiire Heuer vividly describes how men fought for years with only fleeting moments of peace Combatants were promised promotion financial gain and patriotic glory They were also rewarded for their service by being allowed to return home to waiting families and love interests and with marriages that were arranged and financially supported by the state Heuer explores competing ideas of masculinity in France as well as the experiences of the men and women who participated in such marriages She argues that we cannot fully understand the changing nature of war and peace in this period without considering the important roles played by family gender and romantic entanglements Casting new light on a turbulent era of mass mobilization and seemingly endless conflict The Soldier's Reward shows how from the Revolution through the Restoration war intimacy and citizenship intersected in France in new and unexpected ways
