## **French Medieval Armies 1000-1300:**

**French Medieval Armies** Angus McBride, 1993      French Medieval Armies 1000-1300 David Nicolle, 1991-04-25 By the 11th century the French King had lost control of border regions while local warfare had grown alarmingly frequent. In fact the energies of the French military elite were now focused on petty internal squabbles and external adventures like the Norman conquest of England. Nevertheless the population and economy both expanded although it was not until the 12th century that the crown rebuilt its power base. Despite its slow start when compared with neighbours like England the Kingdom of France had by the 13th century risen to become the most powerful state in Western Europe. This title describes the organisation, history and tactics of French medieval armies.

## **Armies of the Medieval Italian Wars 1125-1325**

Gabriele Esposito, 2019-02-21 The great powers of medieval Europe fought continuously in the Italian peninsula between the 12th and 14th centuries as they sought to expand their territory. Invading armies from Germany, the Holy Roman Empire saw the creation of the defensive Lombard League of northern Italian city states. These struggles resulted in conflicts between rival confederacies which in turn proved to be the catalysts for developments in organisation and tactics. Italian urban militias became better organised and equipped. The Imperial armies went from being mostly German to multi-national forces and both sides became reliant on mercenary forces to prosecute their wars. After the 1260s France, relying mainly on armoured cavalry and Spain with their innovative light infantry vied for control of southern Italy. On the seas the great naval powers of Genoa, Pisa and Venice became fierce rivals as they created great trading empires bringing the treasures of the east into feudal Europe. Using detailed colour plates this beautifully illustrated book describes the myriad of armies and navies that fought for control of Italy in the Middle Ages.

## **Armies of Feudal Europe 1066-1300**

*War and Combat, 1150-1270* Catherine Hanley, 2003 An investigation of the depiction of warfare in contemporary writings in both fictional narratives and factual accounts.

Armies of the Crusaders, 1096-1291 Gabriele Esposito, 2025-08-05 Gabriele Esposito provides a detailed coverage of the elite Military Orders whose members combined the fervor of a religious brotherhood with elite military professionalism. The Crusades were among the most astonishing historical events that took place during the Middle Ages. After centuries of relative isolation following the fall of the Roman Empire, Western Europe looked again towards the Middle East in search of lands to conquer. Incited by the Church to believe that the Holy Land must be liberated from its Muslim rulers who had by then occupied it for centuries and that to do so would bring spiritual salvation, many thousands from all over Christian Europe took the cross and joined the Crusades. Led by some of the most illustrious personalities of the age such as Richard the Lionheart and Frederick

Barbarossa they fought numerous campaigns and even founded new Crusader states some of which lasted for almost two centuries Gabriele Esposito gives an overview of the key events of these campaigns from the First Crusade in 1096 to the fall of Acre the last Christian stronghold in the Holy Land in 1291 He analyzes the various contingents that made up the Crusader forces describing their equipment and tactics and showing how they attempted to adapt to unfamiliar terrain and enemies Included of course are the military orders the Templar Hospitaller and Teutonic knights who combined the religious fervour of a monastic brotherhood with martial prowess forming an elite core to the Christian forces As usual the informative text is lavishly illustrated with color photos depicting replica weapons and equipment in use

**Twenty Battles That Shaped Medieval Europe** Georgios Theotokis, 2019-07-31 Warfare has been central to European history for millennia Twenty Battles that Shaped Medieval Europe examines the strategy military and equipment and battle tactics of European armies in the Middle Ages Its fundamental aim is to stimulate the reader s interest in the importance of pitched battles in war and to explain the geo political gravity of twenty of them from the Battle of Frigidus in AD394 to the Battle of Varna in 1444 taking in such key battles as Hastings in 1066 and Bouvines in 1214

*Medieval Warfare 1000-1300* John France, 2017-05-15 The study of medieval warfare has developed enormously in recent years The figure of the armoured mounted knight who was believed to have materialized in Carolingian times long dominated all discussion of the subject It is now understood that the knight emerged over a long period of time and that he was never alone on the field of conflict Infantry at all times played a substantial role in conflict and the notion that they were in some way invented only in the fourteenth century is no longer sustainable Moreover modern writers have examined campaigns which for long seemed pointless because they did not lead to spectacular events like battles As a result we now understand the pattern of medieval war which often did not depend on battle but on exerting pressure on the opponent by economic warfare This pattern was intensified by the existence of castles

and careful study has revealed much about their development and the evolving means of attacking them Crusading warfare pitted westerners against a novel style of war and affords an opportunity to assess the military effectiveness of European methods New areas of study are now developing The logistics of medieval armies was always badly neglected while until very recently there was a silence on the victims of war Assembled in this volume are 31 papers which represent milestones in the development of the new ideas about medieval warfare set in context by an introductory essay Armies of the Normans 911-1194 Gabriele Esposito, 2024-04-30 Explore the Norman legacy all the way from its Viking origins to Christian crusading knights spanning conquests in Europe and beyond revealing a fierce spirit and military prowess documented with full color illustrations The Norman story began in 911 when a frightened French king Charles III the Simple gave land on the Channel coast to the Viking leader Rollo in return for adopting Christianity and helping repel other Viking marauders Rollo and his fellow Norsemen hence Normandy and Normans adopted all the trappings of feudalism evolving from pagan ship borne raiders to archetypal Christian knights and builders of castles However they seem to have lost none of their ferocity and adventuring spirit As well as Duke William s famous cross Channel conquest Norman forces often mercenaries conquered territories in Spain Sicily Malta Italy and Albania and formed the hard core of the early Crusades Bohemond captured Antioch from the Turks and set up a principality that endured almost two centuries Gabriele Esposito discusses the armies of the Normans in all these theaters incorporating not only the Norman knights but the various feudal levies local auxiliaries and mercenary contingents that fought with them Having outlined the major battles and campaigns he details their equipment weapons and tactics The accessible text is supported by numerous color photographs of replica costume weapons and equipment in use **Late Medieval and Early Modern Fight Books** , 2016-06-27 Late Medieval and Early Modern Fight Books offers insights into the cultural and historical transmission and practices of martial arts based on the corpus of the Fight Books Fechtbücher in 14th to 17th century Europe The first part of the book deals with methodological and specific issues for the studies of this emerging interdisciplinary field of research The second section offers an overview of the corpus based on geographical areas The final part offers some relevant case studies This is the first book proposing a comprehensive state of research and an overview of Historical European Martial Arts Studies One of its major strengths lies in its association of interdisciplinary scholars with practitioners of martial arts Contributors are Sydney Anglo Matthias Johannes Bauer Eric Burkart Marco Cavina Franck Cinato John Clements Timothy Dawson Olivier Dupuis Bert Gevaert Dierk Hagedorn Daniel Jaquet Rachel E Kellet Jens Peter Kleinau Ken Mondschein Reinier van Noort B Ann Tlusty Manuel Valle Ortiz Karin Verelst and Paul Wagner *Illuminating the Border of French and Flemish Manuscripts, 1270-1310* Lisa Moore Hunt, 2013-10-14 This study first examines the marginal repertoire in two well known manuscripts the Psalter of Guy de Dampierre and an Arthurian Romance within their material and codicological contexts This repertoire then provides a template for an extended study of the marginal motifs that appear in eighteen related manuscripts which range from a Bible to illustrated versions of

the encyclopedias of Vincent de Beauvais and Brunetto Latini Considering the manuscript as a whole work of art the marginalia s physical relationship to nearby texts and images can shed light on the reception of these illuminated books by their medieval viewers
