Tears of the Moon Nicole Sharp, 2025-08-05 Harper Barrett is about to embark on the trip of a lifetime in Peru. Visions of Machu Picchu, beaming selfies, and alpacas dance in her head as she wings her way to the land of the Inca. CIA agent Nick Robbins is in desperate need of a vacation. He has his eyes set on a tropical beach where he can dig his toes in the sand and let all his cares drift away while he sips some umbrella-topped concoction. But you know what they say about best-laid vacation plans. From the moment she lands, Harper is propelled into a staggering misadventure. Lucky for her, Nick Robbins stumbles across her path in all his ruggedly handsome but somewhat battered and bruised glory. Harper and Nick join forces as they race against time to help untangle an ancient mystery, traverse unexpected desire, and find a strong enough cell signal to call for help. And Harper learns that being a good friend doesn't just involve bailing someone out of jail; it sometimes requires hiring mercenaries. *Tears of the Moon* is the first book in the Secrets of the Moon trilogy. This action-adventure rom-com has Sharp's trademark humor, well-written prose, and impeccable pace. It's *Romancing the Stone* meets *The Spy Who Dumped Me*.

Death of the Moon S.A. Pavlik, 2022-04-14 A werewolf with secrets, Alec Channing has lived a long life, and he's just going through the motions, lost in his troubled past until fellow werewolves and shifters start dying around him. An increase in werewolf attacks only adds to Alec's problems. As his past closes in, his only hope lies in one man, an unaware human whose vanilla and spice scent and easygoing attitude draw Alec in. However, Alec can't help but worry about what will happen when that man uncovers the truth about Alec's preternatural world. A homicide detective who is out of his depth, Detective Damien O'Connor joined the Columbus Police Department to bring closure to victims and their families, closure that he never got for himself. But when none of the evidence adds up for what should be a routine death investigation, he's floundering. As the bodies continue to pile up, the sweet man who has caught Damien's eye is at the center of the storm. When closely guarded secrets start to emerge, can Damien reconcile himself to an entirely new reality and solve the case that might also save the man he's come to care for? *Death of the Moon* is Book One of the Secrets of the Moon trilogy, an 84k-word M/M paranormal crime mystery romance with an HFN ending. While there is a complete story arc in this book, there are plot threads that will carry on throughout the trilogy. There is language and explicit intimate scenes not suitable for readers under the age of 18. Warnings: MC with PTSD, past torture implied through flashbacks, dealing with grief.

Blood on the Moon Edward Steers Jr., 2005-10-21 Winner of the 2001 The Lincoln Group of New York's Award of Achievement. A History Book Club Selection. The assassination of Abraham Lincoln is

usually told as a tale of a lone deranged actor who struck from a twisted lust for revenge This is not only too simple an explanation Blood on the Moon reveals that it is completely wrong John Wilkes Booth was neither mad nor alone in his act of murder He received the help of many not the least of whom was Dr Samuel Alexander Mudd the Charles County physician who has been portrayed as the innocent victim of a vengeful government Booth was also aided by the Confederate leadership in Richmond As he made his plans to strike at Lincoln Booth was in contact with key members of the Confederate underground and after the assassination these same forces used all of their resources to attempt his escape Noted Lincoln authority Edward Steers Jr introduces the cast of characters in this ill fated drama he explores why they were so willing to help pull the trigger and corrects the many misconceptions surrounding this defining moment that changed American history After completing an acclaimed career as a research scientist at the National Institutes of Health Edward Steers Jr has turned his research skills to the Lincoln assassination He is the author of several books about the president including The Trial

Crescent Moon over the Rational Stephen H. Watson, 2009-09-23 Why and in what manner did artist Paul Klee have such a significant impact on twentieth century thinkers His art and his writing inspired leading philosophers to produce key texts in twentieth century aesthetics texts that influenced subsequent art history and criticism Heidegger Adorno Benjamin Merleau Ponty Lyotard Sartre Foucault Blanchot Derrida and Marion are among the philosophers who have engaged with Klee's art and writings Their views are often thought to be distant from each other but Watson puts them in conversation His point is not to vindicate any final interpretation of Klee but to allow his interpreters different accounts to interact to shed light on their and on Klee's work and in turn to delineate both a history and a theoretical problematic in their midst *Crescent Moon over the Rational* reveals an evolving theoretical constellation of interpretations and their questions theoretical artistic and political that address and continually renew Klee's rich legacies Origin of the Earth and Moon Robin M. Canup, Kevin Righter, 2000-11-01 The age old question of how our home planet and its satellite originated has in recent times undergone a minor revolution The emergence of the giant impact theory as the most successful model for the origin of the Moon has been difficult to reconcile with some aspects of the Earth and the development of an integrated model for the origin of the Earth Moon system has been difficult for this reason However recent technical advances in experimental and isotopic work together with intensified interest in the modeling of planetary dynamics have produced a wealth of new results requiring a rethinking of models for the origin of the Earth and Moon This book is intended to serve as a resource for those scientists working closely in this field while at the same time it provides enough balance and depth to offer an introduction for students or technically minded general readers Its thirty chapters address isotopic and chemical constraints on accretion the dynamics of terrestrial planet formation the impact triggered formation of the Earth Moon system differentiation of the Earth and Moon the origin of terrestrial volatiles and conditions on the young Earth and Moon Covering such subjects as the history and origin of the Moon's orbit water on the Earth and the implications of Earth Moon interactions for terrestrial
