Global Mobility Arianna Dagnino, 2015-06-30 In *Transcultural Writers and Novels in the Age of Global Mobility* Arianna Dagnino analyzes a new type of literature emerging from artists increased movement and cultural flows spawned by globalization. This transcultural literature is produced by authors who write across cultural and national boundaries and who transcend in their lives and creative production the borders of a single culture. Dagnino's book contains a creative rendition of interviews conducted with five internationally renowned writers: Inez Baranay, Brian Castro, Alberto Manguel, Tim Parks, and Ilija Trojanow, and a critical exegesis reflecting on thematic, critical, and stylistic aspects. By studying the selected authors' corpus of work, life experiences, and cultural orientations, Dagnino explores the implicit, often subconscious process of cultural and imaginative metamorphosis that leads transcultural writers and their fictionalized characters beyond ethnic, national, racial, or religious loci of identity and identity formation. Drawing on the theoretical framework of comparative cultural studies, she offers insight into transcultural writing related to belonging, hybridity, cultural errancy, the Other, worldviews, translingualism, deterritorialization, neomadism, as well as genre, thematic patterns, and narrative techniques. Dagnino also outlines the implications of transcultural writing within the wider context of world literature and identifies some of the main traits that characterize transcultural novels.

Canadian Reference Sources Mary E. Bond, Martine M. Caron, 1996 This bibliography cites those Canadian and foreign reference sources that describe Canadian people, institutions, organizations, publications, art, literature, languages, and history. It lists books of a general nature as well as works in the disciplines of history and the humanities. These large divisions are then broken down by subject, genre, type of document, and province or territory. Titles of national, provincial, territorial, or regional interest are included in every subject area when available. The contents of the book are indexed four ways: by name, title, French subject, and English subject. And to facilitate browsing, the major reference books, those dealing with more than one subject or a large geographical region, are also cross-referenced. Two entries have been created for each bilingual document in order to provide access and bibliographical descriptions in both of Canada's official languages. Entries for unilingual works include a citation in the language of the publication and a bilingual annotation. The annotations are descriptive and provide information on the content, arrangements, and indexing of works, the availability of non-print formats, previous editions, and title changes and related works. *Canadian Reference Sources* will be an invaluable reference tool for future scholars and researchers.

Caste and nature Mukul Sharma, 2017-09-25 Rarely do Indian environmental discourses examine nature through the lens of caste. Whereas nature is considered as universal and inherent, caste is understood as a constructed historical and social entity. Mukul Sharma shows how caste and nature are intimately connected. He compares Dalit meanings of environment to ideas and practices of neo-Brahmanism and certain mainstreams of environmental thought. Showing how Dalit experiences of environment are ridden with metaphors of pollution, impurity, and dirt, the author is able to bring forth new dimensions on both environment and Dalits without valorizing the latter's standpoint. Rather than looking for a coherent understanding of their ecology, the book explores the diverse and rich

intellectual resources of Dalits such as movements songs myths memories and metaphors around nature These reveal their quest to define themselves in caste ridden nature and building a form of environmentalism free from the burdens of caste The Dalits also pose a critical challenge to Indian environmentalism which has until now marginalized such linkages between caste and nature **R.E.S.C.U. Ecocriticism of the Global South Scott Slovic, Swarnalatha Rangarajan, Vidya Sarveswaran, 2015-03-24 The vast majority of existing ecocritical studies even those which espouse the postcolonial ecocritical perspective operate within a first world sensibility speaking on behalf of subalternized human communities and degraded landscapes without actually eliciting the voices of the impacted communities Ecocriticism of the Global South seeks to allow scholars from or intimately familiar with underrepresented regions to write back to the world's centers of political and military and economic power expressing views of the intersections of nature and culture from the perspective of developing countries This approach highlights what activist and writer Vandana Shiva has described as the relationship between ecology and the politics of survival showing both commonalities and local idiosyncrasies by juxtaposing such countries as China and Northern Ireland New Zealand and Cameroon Much like Ecoambiguity Community and Development this new book is devoted to representing diverse and innovative ecocritical voices from throughout the world particularly from developing nations The two volumes complement each other by pointing out the need for further cultivation of the environmental humanities in regions of the world that are essentially the front line of the human struggle to invent sustainable and just civilizations on an imperiled planet

Does Torture Work? John W. Schiemann, 2015-10-01 When the Senate released its so called Torture Report in December 2014 the world would learn that for years the CIA had used unimaginably brutal methods to interrogate its prisoners often without yielding any useful or truthful information The agency had long and adamantly defended its use of torture staunchly arguing that it was not only just but necessary for the country's safety And even amid the revelations of the report questions abound about whether torture can be considered a justifiable tool of national security Is interrogational torture an effective method of extracting information How good does the information extracted need to be for the torture to be considered successful How often or how vigorously must torture be used to achieve valuable information It may be the case that interrogational torture can never be justified under any circumstances but according to John Schiemann if it is to be justified at all it must be effective According to more than one national poll most Americans do believe that torture can work and that it can be justified under certain circumstances But if the information that torturers extract is bad then the method amounts to nothing more than pure sadism So how can we solve the dilemma over whether to torture or not to torture In this book John Schiemann takes a truly unique approach to the question of torture game theory Thinking of torture as a game played between an interrogator and a detainee the book walks the reader through the logic of interrogational torture comparing the outcomes to the claims made by torture proponents The book draws on a wide variety of sources ranging from records of the Inquisition to secret CIA memos to trace this logic illustrating each outcome of the model with a narrative from the real world of interrogational torture Does Torture Work is an absorbing and provocative take on one of the most discussed human rights and security dilemmas of our time
