The New Tenement Florian Urban, 2017-10-12 This book examines new tenements dense medium rise multi storey residences that have been the backbone of European inner city regeneration since the 1970s and came with a new positive view on urban living Focusing principally on Berlin Copenhagen Glasgow Rotterdam and Vienna it relates architectural design to an evolving intellectual framework that mixed anti modernist criticism with nostalgic images and strategic goals and absorbed ideas about the city as a generator of creativity locale of democratic debate and object of personal identification This book analyses new tenements in the context of the post functionalist city and its mixed use neighbourhoods redeveloped industrial sites and regenerated waterfronts It demonstrates that these buildings are both generators and outcome of an urban environment characterised by information exchange rather than industrial production individual expression rather than mass culture visible history rather than comprehensive renewal and conspicuous difference rather than egalitarianism It also shows that new tenements evolved under a welfare state that all over Europe has come under pressure but still to a certain degree balances and controls heterogeneity and economic disparities
